POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are stored in electronic and/or paper form.

RETRIEVABILITY:

Records may be retrieved by user name, user ID, e-mail address, or other identifying search term employed, depending on the record category. The Peace Corps does not usually connect IP addresses with a person. However, in some instances, for official government business purposes, the Department may connect the IP address with an individual, and records may be retrieved by IP address.

SAFEGUARDS:

Access is limited to those who have an official need to know. Specifically, only systems and security personnel or persons authorized to assist these personnel have access to automated records and magnetic storage media. These records are kept in a locked room with controlled entry. The use of password protection identification features and other automated data processing system protection methods also restrict access. All records are located in buildings with restricted access.

RETENTION AND DISPOSAL:

Records of verification, authorization, computer system access, and other activities generated by the system shall be retained no longer than one year, unless required for management review. After one year, they are destroyed or deleted. (Records retention schedule pending approval by the Archivist of the United States.)

SYSTEM MANAGER(S) AND ADDRESS:

Office of Information Resource Management, Peace Corps, 1111 20th Street, NW., Washington, DC 20526.

NOTIFICATION PROCEDURES:

To the extent permitted under the Privacy Act of 1974, 5 U.S.C. 552a(k)(5), this system is exempted from the provisions of the Privacy Act of 1974 that permit access and correction. Individual notification of this system and declaration of acceptance of this policy appears in the form of a Privacy Screen that must be acknowledged by each individual before access is granted to use a Peace Corps computer. This prompt appears with every beginning access or initiation of systems on the computer.

Any individual who wants to know whether this system of records contains a record about him or her, who wants access to his or her record, or who wants to contest the contents of records, should make a written request to the System Manager. Requesters will be required to provide adequate identification such as a driver's license or employee identification card, or other identifying document. The written request should provide name, assigned computer location, and a description of information being sought, including the time frame during which the record(s) may have been generated. Provide verification of identity. Identify the information being contested, the reason for contesting it, and the correction requested. In general, this information is computer-generated and is not subject to contest.

CONTESTING RECORD PROCEDURES:

See Notification Procedures above.

RECORD ACCESS PROCEDURES:

See Notification Procedures above.

RECORD SOURCE CATEGORIES:

Most records are generated internally, i.e., computer activity logs; individuals covered by the system; and management officials.
