Standards for Business Practices of Interstate Natural Gas Pipelines, Order No. 587-Q; Docket No. RM96-1-022; Order on Rehearing and Clarification.

Issued July 23, 2002.

1. In Order No. 587-O,¹ the Federal Energy Regulatory Commission (Commission) amended § 284.12 of its open access regulations to incorporate by reference Version 1.5 of the consensus industry standards for the natural gas industry promulgated by the Wholesale Gas Quadrant of the North American Energy Standards Board (NAESB). These standards include requirements related to title transfer tracking (TTT) under which pipelines generally are responsible for accommodating title transfer tracking services at all pooling points.

2. On May 31, 2002, National Fuel Gas Supply Corporation (National Fuel) filed a request for clarification and rehearing relating to the adoption of the TTT standards. In particular, National Fuel contends that pipelines need only support TTT where the pipeline has a contractual relationship with a Title Transfer Tracking Service Provider or Third Party Account Administrator and that the only parties for whom pipelines need to accommodate TTT services are Title Transfer Tracking Service Providers or Third Party Account Administrators. As discussed below, the Commission provides clarification that a party requesting the processing of title transfers must have a contract with the pipeline, but denies National Fuel’s request that pipelines be required to process title transfer nominations only from Title Transfer Tracking Service
