**SUPPLEMENTARY INFORMATION:** 5 CFR 1320.12(a) requires that we provide a 60-day notice in the *Federal Register* concerning a collection of information to solicit comments on:

(a) Whether the collection of information is necessary for the proper functioning of the agency, including whether the information will have practical utility;

(b) the accuracy of our estimates of the information collection burden, including the validity of the methodology and assumptions we use;

(c) ways to enhance the quality, utility, and clarity of the information collected; and

(d) ways to minimize the information collection burden on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

The Mineral Leasing Act of 1920, as amended (30 U.S.C. 181 *et seq.*), gives the Secretary of the Interior responsibility for oil and gas leasing on approximately 600 million acres of public lands and national forests, and private lands where the Federal Government retains the mineral rights. Congress passed the Federal Onshore Oil and Gas Leasing Reform Act of 1987 requiring BLM to offer all public lands that are available for oil and gas leasing by competitive oral bidding before accepting noncompetitive lease applications. The Department of the Interior Appropriations Act of 1981 (43 U.S.C. 6508) provides for the competitive leasing of the lands in the National Petroleum Reserve—Alaska. The Geothermal Steam Act of 1970 (30 U.S.C. 1001-1025) authorizes the Secretary of the Interior to issue leases for geothermal development.

The regulations (43 CFR part 3100) outline procedures for obtaining a lease to explore for, develop, and produce oil and gas resources located on public lands. The regulations (43 CFR part 3200) outline procedures to issue geothermal leases and the exploration, development and utilization of Federally-owned geothermal resources. BLM needs the information requested on the two forms to process lease bids for oil and gas and geothermal resources and to complete environmental reviews required by NEPA.

You must submit the forms to the proper BLM office. Form 3000-2 requires the name and address to identify the bidder. This allows BLM to ensure that the bidder meets the eligibility requirements in the regulations. The regulations require the bidder to submit one-fifth of the amount of the bid for a geothermal bid or the minimum acceptable bid for an oil and gas lease is the first year's rental and administrative fee. Form 3200-9 requires the name and address of the

entity who will conduct operations on the land. You must also submit the legal land description of the lands you plan to enter or disturb for your exploration/operation. We use the starting and ending dates to determine how long the applicant/operator/contractor intends to conduct operations on the land.

Based on BLM's experience administering this program, we estimate the public reporting burden is 2 hours for completing Form 3000-2 and 2 hours for completing Form 3200-9. These estimates include the time spent on research, gathering, and assembling information, reviewing instructions, and completing the respective forms. In FY 2000, BLM estimated 393 competitive bids for oil and gas and geothermal resources and 50 Notice of Intent to Conduct Geothermal Resource Exploration Operations are filed annually, with a total annual burden of 886 hours. Respondents vary from individuals and small businesses to large corporations.

Any member of the public may request and obtain, without charge, a copy of BLM Forms 3000-2 or 3200-9 by contacting the person identified under **FOR FURTHER INFORMATION CONTACT**.

BLM will summarize all responses to this notice and include them in the request for OMB approval. All comments will become a matter of a public record.

Dated: July 18, 2002.

Michael H. Schwartz,

Bureau of Land Management, Information Collection Clearance Officer.
