k. *Description of Request:* As the result of a meeting held on July 25, 2002, Alcoa Power Generating Inc. (APGI or licensee), Duke Energy, Carolina Power and Light, Commission staff, and representatives from the resources agencies with responsibility for water for the States of North Carolina and South Carolina concerning the drought in the project area and reservoir levels in the project reservoirs, there emerged a consensus that it would be prudent on behalf of all users of water in the watershed to further reduce minimum releases from the Yadkin Project from 1,200 cubic feet per second (cfs) to 900 cfs as measured at the Rockingham, NC stream gage. Accordingly, APGI requested from the Commission that it be granted a temporary variance of the license requirements permitting APGI to coordinate Yadkin Project operations with Carolina Power and Light's Tillery and Blewett Falls developments such that Pee Dee River flows, measured at the Rockingham gage, are at least 900 cfs on a daily basis through September 15, 2002. Secondly, APGI requested a temporary variance of the operating guides to draw down Narrows reservoir (Badin Lake) at increments to be determined in consultation with the Water Resources Division of the North Carolina Department of Environment and Natural Resources. On July 30, 2002, the Commission granted the licensee's requests, but reserved authority to require changes in project operation based upon comments received from this notice.
