2. Neptune Regional Transmission System, LLC

[Docket No. ER01-2099-002]

Take notice that on August 13, 2002, Neptune Regional Transmission System, LLC (Neptune), filed with the Federal Energy Regulatory Commission (Commission), a motion to modify certain provisions of the Commission's orders in the proceeding in Docket No. ER01-2099-000: Neptune Regional Transmission System, LLC, 96 FERC ¶ 61,147 (2001), order on reh'g, 96 FERC ¶ 61,326 (2001), order on clarification, 98 FERC ¶ 61,140 (2002).

Neptune requests that the Commission amend its prior orders to permit Neptune to negotiate to sell long-term Transmission Scheduling Rights (TSRs) outside of an open season process, that the Commission permit affiliate participation in the initial allocation or sale of TSRs as well as in the secondary market for TSRs, and that the Commission clarify that the deadline for recalling TSRs lost in the "use it or lose it" process can be identical to the deadline under the Standard Market Design tariff for changing transmission schedules.

Neptune claims that the open season process is impractical and unnecessary to achieving Commission goals, that there are no market power concerns present with respect to allowing affiliate participation in the initial allocation or sale of TSRs, that the open season requirement and affiliate restrictions are inconsistent with the Commission's Standard Market Design, and that TSR holders should be allowed to exercise their recall rights within the same time-frames as a market participant would be

allowed to change their day-ahead schedules according to the Standard Market Design Tariff.

[Docket No. CP02-52-000]

Iroquois Gas Transmission System, L.P., Notice of Availability of the Draft Environmental Impact Statement for the Proposed Eastern Long Island Extension Project

August 23, 2002.

The staff of the Federal Energy Regulatory Commission (FERC or Commission) has prepared a Draft Environmental Impact Statement (DEIS) on the natural gas pipeline facilities proposed by Iroquois Gas Transmission System, L.P. (Iroquois) in the above-referenced docket.

The DEIS was prepared to satisfy the requirements of the National Environmental Policy Act. The staff concludes that approval of the proposed project with the appropriate mitigating measures as recommended, would have limited adverse environmental impact. The DEIS also evaluates alternatives to the proposal, including system alternatives; major route alternatives; and route variations, and requests comments on them.

The DEIS addresses the potential environmental effects of the construction and operation of the following facilities:

- 29.1 miles of 20-inch-diameter pipeline in New Haven County, Connecticut, and Suffolk County, New York;
- a new meter station along the proposed ELI pipeline at about milepost (MP) 29.1;
- ancillary facilities including a marine tap interconnection and facilities for the attachment of a pig launcher in Long Island Sound in Connecticut state waters; three mainline valves (MPs 17.5, 22.7, and 29.1), and one pig receiving facility housed within the meter station layout at the project terminus at MP 29.1;
- a new 20,000 horsepower compressor station at Iroquois' existing
