#### Final Environmental Impact Statement for Santa Cruz Island Primary Restoration Plan Channel Islands National Park Santa Barbara County, CA; Notice of Availability

**SUMMARY:** Pursuant to § 102(2)(c) of the National Environmental Policy Act of 1969 (Pub. L. 81-190 as amended), the National Park Service, Department of the Interior, has prepared a Final Environmental Impact Statement (EIS) assessing the potential impacts of restoring Santa Cruz Island by eradicating feral pigs from the island and controlling fennel (both are non-native species). This Final EIS analyzes the effects of implementing proposed actions that accomplish the following objectives: (1) Restore native plant communities; (2) protect plant species that have been listed as endangered or threatened under the Endangered Species Act; (3) reduce the spread of noxious weeds; (4) protect the native Island fox; (5) protect archeological sites; and (6) conserve soil resources on the island. The proposed action was developed in coordination with The Nature Conservancy, owners of 75% of Santa Cruz Island. The actions proposed in this Final EIS are necessary because of the adverse ecological impacts these non-native species are having on Santa Cruz Island.

### Proposal

The proposal for eradicating pigs from Santa Cruz Island is to divide the island into six fenced zones and to sequentially eradicate pigs zone by zone. Approximately 45 miles of fence
