BILLING CODE 4310–33–P

DEPARTMENT OF THE INTERIOR**Bureau of Reclamation**

**Fish Passage Improvement Project at
the Red Bluff Diversion Dam, Tehama
County, California**

AGENCY: Bureau of Reclamation, Interior.

ACTION: Notice of Availability (NOA) of the Draft Environmental Impact Statement/Environmental Impact Report (DEIS/EIR) and notice of public hearing.

SUMMARY: The Bureau of Reclamation and the Tehama-Colusa Canal Authority (TCCA) have made available for public review and comment the DEIS/EIR for the Fish Passage Improvement Project at the Red Bluff Diversion Dam.

The DEIS/EIR outlines the proposed project alternatives that seek to address issues related to the Red Bluff Diversion Dam, including fish passage and water supply. Current dam operations do not adequately allow passage of threatened and endangered fish species. Additionally, current dam operations create a situation where agricultural demand outstrips the dam's capacity to deliver water. To address these critical issues, TCCA and Reclamation are working together to determine an appropriate solution.

The project goals are to:

- Substantially improve the long-term reliable level of anadromous fish passage, both upstream and downstream, past the Red Bluff Diversion Dam.

- Substantially improve the long-term ability to reliably and cost-effectively move sufficient water into the Tehama-Colusa Canal and the Corning Canal systems to meet the needs of the water districts served by the TCCA.

The TCCA and Reclamation are working together as "co-lead" agencies, sponsoring this project to achieve the same project purpose and need. However, they are independent agencies with various interests and methods for approaching a project such as this one. Work conducted to date has built upon a wide array of previous studies conducted at the dam.

DATES: A public hearing will be held on September 25, 2002, to provide the public with an opportunity to study and comment on environmental issues
