The limits set forth above are subject to adjustment pursuant to the provisions of the ATC and administrative arrangements notified to the Textiles Monitoring Body.

Products in the above categories exported during 2002 shall be charged to the applicable category limits for that year (see directive dated November 27, 2001) to the extent of any unfilled balances. In the event the limits established for that period have been exhausted by previous entries, such products shall be charged to the limits set forth in this directive.

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception of the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,
James C. Leonard III,
Chairman, Committee for the Implementation of Textile Agreements.

Availability of Non-Exclusive, Exclusive License or Partially Exclusive Licensing of U.S. Patent Concerning Flat Panel, Three Dimensional Display Unit

AGENCY: Department of the Army, DoD.
ACTION: Notice.

SUMMARY: In accordance with 37 CFR part 404.6, announcement is made of the availability for licensing of U.S. Patent US 6,181,303 B1 entitled "Flat Panel, Three Dimensional Display Unit" issued January 30, 2001. This patent is assigned to the United States Government as represented by the Secretary of the Army.

FOR FURTHER INFORMATION CONTACT: Mr. Kelly McGuire at U.S. Army Aviation and Missile Command, AMSAM-RD-AS-TI, Redstone Arsenal, AL 35898, Phone 256/876-8743 or e-mail kelly.mcguire@rdc.redstone.army.mil.

SUPPLEMENTARY INFORMATION: Any licenses granted shall comply with 35 U.S.C. 209 and 37 CFR Part 404.

Availability for Non-Exclusive, Exclusive, or Partially Exclusive Licensing of U.S. Patents and U.S. Patent Application Concerning Method for Predicting Human Cognitive Performance

AGENCY: Department of the Army, DOD.
ACTION: Notice.

SUMMARY: In accordance with 37 CFR 404.6 and 404.7, announcement is made of the availability for licensing of the following: U.S. Patent No. 6,419,629 entitled "Method for Predicting Human Cognitive Performance," issued July 16, 2002; U.S. Patent No. 6,241,686 entitled "System and Method for Predicting Human Cognitive Performance Using data from an Actigraph," issued June 5, 2001; and U.S. Patent Application No. 09/848,352 entitled "Method and System for Predicting Human Cognitive Performance", filed May 4, 2001. The United States Government, as represented by the Secretary of the Army has rights in these inventions.

ADDRESSES: Commander, U.S. Army Medical Research and Materiel Command, ATTN: Command Judge Advocate, MCMR-JR, 504 Scott Street, Fort Detrick, MD 21702-5012.

FOR FURTHER INFORMATION CONTACT: For patent issues, Ms. Elizabeth Arwine, Patent Attorney, (301) 619-7808. For licensing issues, Dr. Paul Mele, Office of Research & Technology Assessment, (301) 619-6664, both at telefax (301) 619-5034.

SUPPLEMENTARY INFORMATION: An apparatus and method for predicting cognitive performance of an individual based on factors including sleep history and the time of day. The method facilitates the creation of predicted cognitive performance curves that allow an individual to set his/her sleep times to produce higher levels of cognitive performance. The method also facilitates

the reconstruction of past cognitive performance levels based on sleep history.

Department of the Army; Corps of Engineers

Intent To Prepare a Draft Programmatic Environmental Impact Statement (DEIS) for the Florida Keys Water Quality Improvements Program

AGENCY: Department of the Army, U.S. Army Corps of Engineers, DoD.

ACTION: Notice of intent.

SUMMARY: The Jacksonville District, U.S. Army Corps of Engineers (Corps) intends to prepare a Draft Programmatic Environmental Impact Statement (EIS) for the Florida Keys Water Quality Improvement Program involving the planning, design and construction of

wastewater treatment systems to improve water quality within the Florida Keys National Marine Sanctuary. This program is a cooperative effort between the Corps (lead Federal agency) and the South Florida Water Management District (non-Federal sponsor).

FOR FURTHER INFORMATION CONTACT:

Barbara Cintron, 904-232-1692, Environmental Branch, Planning Division, P.O. Box 4970, Jacksonville, Florida 32232-0019 or e-mail at: Barbara.B.Cintron@saj02.usace.army.mil.

SUPPLEMENTARY INFORMATION: Under authority of Public Law 106-554, Department of Labor, Health and Human Services and Education, Related Agencies Appropriations Act of 2001, Section 109 and Conference Report H.R. 4577, the Corps is authorized to provide technical and financial assistance to carry out projects for the planning, design and construction of treatment works to improve the water quality of the Florida Keys National Marine Sanctuary. The marine ecosystem of the Florida Keys National Marine Sanctuary is dependent on acceptable water quality to maintain fragile aquatic habitats. However, as population and tourism within the Keys have increased over the years, improvements in wastewater treatment and management practices have not kept pace with this growth. Ongoing research has suggested that this trend has resulted in a significant degradation of water quality in canals and nearshore waters surrounding the Florida Keys and that nutrients from wastewater are one of the major contributors to the decline of the water quality. This, in turn, is prompting the proposal to improve sewage treatment practices throughout the Florida Keys. According to the Monroe County Sanitary Wastewater Master Plan, approximately 23,000 private onsite systems and 250 small wastewater treatment plants are currently operating throughout the Florida Keys. It is estimated that the onsite systems contribute 4.88 million gallons per day (mgd) of wastewater and the treatment plants contribute an additional 2.40 mgd of wastewater. Many of these onsite systems and treatment plants provide minimal nutrient removal. The primary objective of the Florida Keys Water Quality Improvements Program is to improve wastewater management practices throughout the Florida Keys and satisfy the existing and future needs for the community. Several wastewater master plans have been prepared for Monroe County and other municipalities within

Monroe County that the Corps plans to utilize as the base for the planning component of the Florida Keys Water Quality Improvement Program. These wastewater master plans recommend that existing onsite systems located in lower density areas of the Florida Keys be upgraded or replaced with onsite wastewater nutrient reduction systems. The wastewater master plan also recommended the construction of 12 community wastewater collection and treatment systems and five regional systems. Five of the 12 community systems would feature interim treatment plants that over time would be phased into larger regional treatment systems. In addition to the new systems and extension of the existing systems, the plans recommend that 17 existing facilities continue to operate and upgrade their treatment processes to meet the best available technology/advanced wastewater treatment standards. The estimated cost to implement these master plans is approximately \$500 million.

Alternatives: Alternatives to be considered include (1) no action, or continued reliance on septic tanks and cesspits for wastewater treatment, or (2) the proposed action involving the implementation of wastewater master plans prepared for Monroe County and various municipalities within Monroe County.

Issues: The EIS will consider water quality impacts on the Florida Keys National Marine Sanctuary, preservation of coral reefs, impacts to protected species, shore protection, health and safety, aesthetics and recreation, fish and wildlife resources, cultural resources, socio-economic resources, and other impacts through scoping, public involvement, and interagency coordination.

Scoping: A copy of this notice will be sent to interested parties to initiate the scoping process, which will involve Federal, State, County and municipal agencies and other interested parties and organizations. All parties are invited to participate in the scoping process by identifying any additional concerns on issues, alternatives, procedures, and other matters related to the scoping process.

Public Involvement: We invite the participation of affected Federal, State, and local agencies, affected Indian tribes, and other interested private organizations and parties. The Corps plans to hold two sets of public meetings associated with the planning component of the Florida Keys Water Quality Improvements Program.

Coordination: The proposed action is being coordinated with U.S. Fish and
