#### Environmental Assessment for Proposal To Construct Odor Treatment Units for the Potomac Interceptor Sewer and Improvements to a Parking Area and Two New Comfort Stations for the C&O Canal National Historical Park

**AGENCY:** National Park Service, Interior.

**ACTION:** Availability of the Environmental Assessment for the proposal to construct odor treatment units for the Potomac Interceptor sewer and improvements to a parking area and two new comfort stations for the C&O Canal National Historical Park.

**SUMMARY:** Pursuant to Council on Environmental Quality regulations and National Park Service policy, the National Park Service announces the availability of an Environmental Assessment for the construction of four odor treatment units for the Potomac Interceptor (PI) sewer and improvements to a parking area and two new comfort stations for the C&O Canal National Historical Park (CHOH). In public use areas along the CHOH and the Clara Barton Parkway (which is administered by the George Washington Memorial Parkway (GWMP)), odorous air is intermittently exhausted from the PI sewer due to several dynamic hydraulic changes in the PI. Sewer odors emitted from the PI have resulted in the completion of an odor study, the implementation of interim odor controls, and the development of the long-term odor abatement program for several areas of the PI. This Environmental Assessment examines several alternatives for implementing four odor control facilities to control nuisance odors along the CHOH and the Clara Barton Parkway, as well as to indicate environmental impacts of the proposed construction of two comfort stations in CHOH access areas, and to improve the parking area at the Anglers Inn C&O Canal access area. The National Park Service is soliciting comments on this Environmental Assessment. These comments will be considered in evaluating it and making decisions pursuant to the National Environmental Policy Act (NEPA).

**DATES:** The Environmental Assessment will remain available for public comment on or before October 11, 2002. Written comments should be received no later than this date. A public meeting will be scheduled at the Glen Echo Community Center during the public comment period to provide responses to
