DATES: The comment period will be extended until October 2, 2002. Comments must be received by the closing date.

ADDRESSES: You may submit written comments and materials concerning the proposal, the draft economic analysis, or the draft EIS to Field Supervisor, U.S. Fish and Wildlife Service, New Mexico Ecological Services Field Office, 2105 Osuna NE, Albuquerque, NM, 87113. SUPPLEMENTARY INFORMATION:

Background

We published a proposed rule to designate critical habitat for the silvery minnow in the **Federal Register** on June 6, 2002 (67 FR 39206). The silvery

minnow presently occurs only in the Rio Grande from Cochiti Dam, Sandoval County, downstream to the headwaters of Elephant Butte Reservoir, Sierra County, New Mexico. We proposed to designate critical habitat within this last remaining portion of the occupied range in the middle Rio Grande (Cochiti Dam to Elephant Butte Dam) in New Mexico. The proposed critical habitat designation defines the lateral extent (width) as those areas bounded by existing levees or, in areas without levees, 91.4 meters (300 feet) of riparian zone adjacent to each side of the middle Rio Grande.

We have not proposed critical habitat designation for two areas important for the conservation of the silvery minnow (*i.e.*, the river reach of the middle Pecos and lower Rio Grande in Big Bend National Park and downstream to the Terrell/Val Verde County line). We proposed a conservation strategy of developing one or more experimental populations under section 10(j) of the Act, because we believe this strategy outweighs any benefits that could be provided to the silvery minnow by including these areas within a designation of critical habitat.

If the proposed rule is finalized, section 7(a)(2) of the Act would require that Federal agencies ensure that actions they fund, authorize, or carry out are not likely to result in the "destruction or adverse modification" of critical habitat. Section 4 of the Act requires us to consider economic and other relevant impacts of specifying any particular area as critical habitat. We request data and comments from the public and all interested parties on all aspects of the proposal, including data on economic and other impacts of the proposed designation.

We held two public hearings to receive comments from the public. The hearings were in Socorro and Albuquerque, NM, on June 25 and 26, 2002 respectively. Public hearings are designed to gather relevant information that the public may have that we should consider in our rule-making. During the hearings, we presented information about the proposed action. We invited the public to submit information and comments either at the hearings or in writing.

Public Comments Solicited

We solicit comments or suggestions from the public, other concerned governmental agencies, tribes, the scientific community, industry, or any other interested parties concerning the proposal, the draft economic analysis, or draft EIS. Our practice is to make all comments, including names and home
