

submitted revisions to Utah's rule R307-301 "Utah and Weber Counties: Oxygenated Gasoline Program". EPA is also proposing approval of the revisions to rule R307-301.

In the Final Rules Section of this **Federal Register**, EPA is approving the determination of attainment for the CO NAAQS for the Provo CO nonattainment area and the revisions to R307-301 as a direct final rule without prior proposal because the Agency views this action as noncontroversial and anticipates no adverse comments. A detailed rationale for the approval is set forth in the direct final rule. If no adverse comments are received in response to this proposed rule, no further activity is contemplated in relation to this rule. If EPA receives adverse comments, the direct final rule will be withdrawn and all public comments received will be addressed in a subsequent final rule based on this proposed rule. EPA will not institute a second comment period on this action. Any parties interested in commenting on this action should do so at this time.

II. Background

A. What Action is the Agency Taking?

In the **Federal Register** referenced for each substance, OPPTS-50577, June 26, 1990 (55 FR 26111), OPPTS-50588, November 6, 1990 (55 FR 46773), OPPTS-50622, August 30, 1995 (60 FR 45082) (FRL-4629-2), OPPTS-50632, August 20, 1998 (63 FR 44575) (FRL-5788-7), establishing significant new uses for the substances, EPA issued a SNUR. Because of additional data EPA has received for these substances, EPA is proposing to revoke the significant new use and recordkeeping requirements for the following chemical substances under 40 CFR part 721, subpart E. In this unit, EPA provides a brief description for each substance, including its PMN number, chemical name (generic name if the specific name is claimed as CBI), CAS number (if assigned), basis for the revocation of the TSCA section 5(e) consent order for the substance, and the CFR citation. Further background information for the substances is contained in Unit I.B.2 of this document.

PMN Number P-86-1491

Chemical name: 3-Hydroxy-1,1-dimethylbutyl derivative (generic).

CAS number: Not applicable.

Federal Register publication date and reference: August 30, 1995 (60 FR 45082).

Docket number: OPPTS-50622.

Basis for revocation of SNUR: EPA issued a TSCA section 5(e) consent order between EPA and the PMN submitter for this substance based on a potential unreasonable risk of cancer by analogy to structurally similar peroxides. Based on the results of test data developed by an industry consortium to address potential toxicity of peroxides, EPA has concluded that available information does not support identification of peroxides as potential carcinogens. Therefore, EPA determined that it could no longer conclude that the manufacturing, processing, and use of P-86-1491 may present an unreasonable risk under section 5(e) of TSCA and has, therefore, revoked the consent order for P-86-1491. EPA can no longer make the finding that activities not described in the TSCA section 5(e) consent order may result in significant changes in human exposure. *CFR citation:* 40 CFR 721.4466.

PMN Number P-86-1492

Chemical name: Alkyl peroxy-2-ethyl hexanoate (generic).

CAS number: Not applicable.

Federal Register publication date and reference: November 6, 1990 (55 FR 46773).

Docket number: OPPTS-50588.

PMN Number P-86-1493

Chemical name: Substituted alkyl peroxyhexane carboxylate (mixed isomers) (generic).

CAS number: Not applicable.

Federal Register publication date and reference: June 26, 1990 (55 FR 26111).

Docket number: OPPTS-50577.

PMN Number P-98-24

Chemical name: Methoxy benzoic acid derivative (generic).

CAS number: Not applicable.

Federal Register publication date and reference: August 20, 1998 (63 FR 44575).

Docket number: OPPTS-50632.

Basis for revocation of SNUR: EPA issued a SNUR for this substance based

on the concern criteria at § 721.170(b)(4)(1). The PMN submitter petitioned EPA to revoke the SNUR based on existing toxicity, fate, and economic data. The results of acute fish, daphnia, and algae studies for the substance demonstrated acute LC₅₀ values ranging from 60-90 parts per million (ppm). EPA's concern concentration of 40 parts per billion (ppb) for the substance is based on potential chronic toxicity. A biodegradation study for the PMN substance measured 90% degradation in 28 days. Commercial use of the PMN substance is limited to use as a mediator in enzyme catalyzed reactions. In addition, EPA expects that most of the PMN substance is destroyed when used in this manner resulting in little or no release of the substance. EPA could not identify additional uses of the PMN substance. Based on this data EPA can no longer make the finding that reasonably anticipated conditions of release may result in significant releases above 40 ppb. Therefore, EPA has concluded that based on available information, the substance does not meet the concern criteria at § 721.170(b)(4)(1).

CFR citation: 40 CFR 721.1710.

B. What is the Agency's Authority for Taking this Action?

Section 5(a)(2) of TSCA (15 U.S.C. 2604(a)(2)) authorizes EPA to determine that a use of a chemical substance is a "significant new use." EPA must make this determination by rule after considering all relevant factors, including those listed in section 5(a)(2) of TSCA. Once EPA determines that a use of a chemical substance is a significant new use, section 5(a)(1)(B) of TSCA requires persons to submit a notice to EPA at least 90 days before they manufacture, import, or process the substance for that use. The mechanism for reporting under this requirement is established under 40 CFR 721.5.

During review of the PMNs submitted for the chemical substances that are the subject of this proposed revocation, EPA concluded that regulation was warranted based on available information that indicated activities not described in the TSCA section 5(e) consent order or PMN might result in significant changes in human or environmental exposure as described in section 5(a)(2) of TSCA. Based on these findings, SNURs were promulgated.

EPA has revoked the TSCA section 5(e) consent orders that are the basis for these SNURs and no longer finds that activities other than those described in the TSCA section 5(e) consent orders or PMN may result in significant changes

in human or environmental exposure. The revocation of SNUR provisions for these substances is consistent with the findings set forth in the preamble to the proposed revocation of each individual SNUR.

Therefore, EPA is proposing to revoke the SNUR provisions for these chemical substances. When this revocation becomes final, EPA will no longer require notice of intent to manufacture, import, or process these substances. In addition, export notification under section 12(b) of TSCA will no longer be required.

III. Statutory and Executive Order Reviews

This proposed rule revokes or eliminates an existing regulatory requirement and does not contain any new or amended requirements. As such, the Office of Management and Budget (OMB) has exempted these types of actions from review under Executive Order 12866, entitled *Regulatory Planning and Review* (58 FR 51735, October 4, 1993).

Since this proposed rule does not impose any requirements, it does not contain any information collections subject to approval under the Paperwork Reduction Act (PRA), 44 U.S.C. 3501 *et seq.*

Pursuant to section 605(b) of the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*), the Agency has determined that SNUR revocations, which eliminate requirements without imposing any new ones have no adverse economic impacts.

Since this proposed rule does not impose any requirements it does not require any other action under Title II of the Unfunded Mandates Reform Act of 1995 (UMRA) (Pub. L. 104-4).

This action will not have a substantial direct effect on States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132, entitled *Federalism* (64 FR 43255, August 10, 1999).

This proposed rule does not have tribal implications because it is not expected to have substantial direct effects on Indian Tribes. This does not significantly or uniquely affect the communities of Indian tribal governments, nor does it involve or impose any requirements that affect Indian Tribes. Accordingly, the requirements of Executive Order 13175 entitled *Consultation and Coordination with Indian Tribal Governments* (65 FR

67249, November 6, 2000), do not apply to this proposed rule.

This action is not subject to Executive Order 13045, entitled *Protection of Children from Environmental Health Risks and Safety Risks* (62 FR 19885, April 23, 1997), because this is not an economically significant regulatory action as defined by Executive Order 12866, and this action does not address environmental health or safety risks disproportionately affecting children.

This proposed rule is not subject to Executive Order 13211, entitled *Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use* (66 FR 28355, May 22, 2001), because this action is not expected to affect energy supply, distribution, or use.

In addition, since this action does not involve any technical standards, section 12(d) of the National Technology Transfer and Advancement Act of 1995 (NTTAA), Public Law 104-113, section 12(d) (15 U.S.C. 272 note), does not apply to this action.

This action does not involve special considerations of environmental justice related issues as required by Executive Order 12898, entitled *Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations* (59 FR 7629, February 16, 1994).

EPA has complied with Executive Order 12630, entitled *Governmental Actions and Interference with Constitutionally Protected Property Rights* (53 FR 8859, March 15, 1988), by examining the takings implications of this proposed rule in accordance with the "Attorney General's Supplemental Guidelines for the Evaluation of Risk and Avoidance of Unanticipated Takings" issued under the Executive Order.

In issuing this proposed rule, EPA has taken the necessary steps to eliminate drafting errors and ambiguity, minimize potential litigation, and provide a clear legal standard for affected conduct, as required by section 3 of Executive Order 12988, entitled *Civil Justice Reform* (61 FR 4729, February 7, 1996).

Environmental protection, Chemicals, Hazardous substances, Reporting and recordkeeping requirements.

Charles M. Auer,

Director, Office of Pollution Prevention and Toxics.

Therefore, it is proposed that 40 CFR part 721 be amended as follows:

PART 721—[AMENDED]

1. The authority citation for part 721 would continue to read as follows:

Authority: 15 U.S.C. 2604, 2607, and 2625(c).

§§ 721.1710, 721.4200, 721.4240, and 721.4466 [Removed]
