NUCLEAR REGULATORY COMMISSION

Workshop on Key Issues Related to the Licensing of Future Non-Light Water Reactors

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of public workshop.

SUMMARY: The NRC has underway preapplication reviews of advanced reactor designs. The purpose of these preapplication reviews is to identify, early in the design process, key safety issues and a path to their resolution. For advanced non-light water reactors, several such key issues were identified and described in SECY-02-0139. The purpose of this workshop is to discuss the issues described in SECY-02-139, including options for their resolution.

DATES: The workshop will be held on October 22-23, 2002—1 p.m. to 5 p.m. on October 22, 2002; 9 to 5 p.m. on October 23, 2002.

ADDRESSES: The workshop will be held at the Double Tree Hotel, 12500 Rockville Pike, Rockville, Maryland.

FOR FURTHER INFORMATION CONTACT: Dr. Farouk Eltawila, Director, Division of Systems Analysis and Regulatory Effectiveness, Office of Nuclear Regulatory Research, Mail Stop T-10 E32, telephone (301) 415-7499; Internet: FXE@nrc.gov, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001.

For material related to the meeting, please contact U.S. NRC Public Affairs Office (301) 415-8200.

SUPPLEMENTARY INFORMATION:

Background

In a paper dated July 22, 2002, (SECY-02-0139, "Plan for Resolving Policy Issues Related to Licensing Non-Light Water Reactors") the Nuclear Regulatory Commission (NRC) staff identified seven issues with potential policy implications resulting from work to date reviewing non-light water reactors. These seven issues are:

- How should the Commission's expectations for enhanced safety be implemented for future non-LWRs?
 - Should specific defense-in-depth attributes be defined for non-LWRs?
 - How should NRC requirements for future non-LWR plants relate to international safety standards and requirements?
 - To what extent should a probabilistic approach be used to establish the plant licensing basis?
 - Under what conditions, if any, should scenario-specific accident source terms be used for licensing decisions regarding containment and site suitability?
 - Under what conditions, if any, can a plant be licensed without a pressure-retaining containment building?
 - Under what conditions, if any, can emergency planning zones be reduced, including a reduction to the site exclusion area boundary?

Discussion

Options for resolving these issues are under development and recommendations on their resolution are due to the Commission in December 2002. The options under consideration are listed in the agenda along with key considerations for discussion. To assist in developing and evaluating options and preparing recommendations, the NRC staff is planning to hold a workshop to discuss and solicit feedback on the issues and options for their resolution, including advantages and disadvantages.

Key Considerations for Discussion

- Feedback is sought specifically on:
- Are the options for resolution being considered appropriate?
 - Are there other options which should be considered?
 - Which option(s) should be pursued and why?
 - Which options should not be pursued and why?

Workshop Agenda

October 22, 2002

- 1-1:15 p.m. Introduction (NRC staff)
 1:15-1:45 Overview of the Seven Issues and Options for Their Resolution (NRC staff)
 Discussion of Issues and Options:
 1:45-3:45 Issue 1: Expectations for Safety
 —Options for Resolution:
 • Maintain current level of safety
 • Require an enhanced level of safety
 • Require an enhanced level of confidence in the design
 —Key Considerations:
 • Should the Commission's Safety Goal Policy apply on a site or a per plant basis?
 • Should safety be improved for future plants to ensure the population of plants that maintain safety?
