

financial statements, rather than audited ones, in order to meet existing periodic reporting, proxy statement, tender offer, and registration requirements, as long as they disclose that the financial statements are unaudited (or not reviewed), provide audited (or reviewed) financial statements at a later date, and explain any material differences between the unaudited and audited financial statements. In certain cases where Andersen clients were required to submit a consent or a reissued accountants' report from their auditor, but cannot obtain the consent or the reissued accountants' report, those requirements have been waived provided the filing includes appropriate disclosure. The disclosures regarding consents and reissued accountants' reports were also approved by OMB as the stand-alone collection of information described above. The collection of information is necessary to ensure that the market receives disclosure from clients of Andersen that are taking advantage of this relief. The collection of information supplies investors with information they may not otherwise have and helps prevent confusion.

When we adopted this collection of information² we estimated that the total number of burden hours associated with this collection of information is 12,783. We requested approval from OMB to extend the expiration date for this collection of information. OMB granted this request. The new expiration date for this collection of information is December 31, 2002.

Applicants state Mountaineer Gas, like Monongahela, Potomac Edison, and West Penn, will use the proceeds of the borrowings from the Money Pool to operate its business as a natural gas utility, including the financing of construction and property acquisitions. Mountaineer's authority to issue short-term debt is limited to an aggregate amount not to exceed \$100 million,³ which limit will apply to any borrowings from the Money Pool.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),¹ and Rule 19b-4 thereunder,² notice is hereby given that on June 11, 2002 the Chicago Board Options Exchange, Incorporated ("CBOE" or "Exchange") filed with the Securities and Exchange Commission ("SEC" or "Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change consists of amendments to CBOE Rules 8.85(a)(xi) and Rule 17.50 to require members to use and maintain CBOE's AutoQuote System as a back-up quoting system. The text of the proposed rule change and Amendment No. 1 are available at the Exchange and at the Commission.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange seeks to adopt new Rule 8.85(a)(xi) which would state that, with respect to a Designated Primary Market-Maker ("DPM") trading station utilizing a proprietary autoquote system, such DPM is obligated to assure that the CBOE AutoQuote system is maintained as a back-up at all times during market hours. The Exchange also proposes to add subparagraph (g)(10) to CBOE Rule 17.50—Imposition of Fines for Minor Rule Violations, to incorporate in its Minor Rule Violation Plan ("Plan") violations of new Rule 8.85(a)(xi).

The CBOE AutoQuote system is provided by CBOE for use by its members and is available at every post on CBOE's options trading floor. It is available to assist DPMs and/or market makers (for trading crowds not operating under the DPM system) in automatically updating market quotations for the multitude of options series traded at any given trading station. The parameters of the AutoQuote system can be customized by CBOE traders in several areas including volatility, dividend, and what is used to represent the price of the underlying. To that end, CBOE Rule 8.85(a)(x) requires DPMs to determine a formula for generating automatically updated market quotations.
