

In addition, the Commission believes that the use of information barriers should ensure that member firms' traders are not executing trades to mark-up or maintain the price of a security it acquired during a block transaction with a customer. Finally, the Commission believes that the hedge exception is consistent with the Act. The Commission believes that the NYSE has tailored the hedge exception to ensure that when a member firm purchases a security to hedge a position that is economically equivalent to a short position, it does so to hedge that short position, not to affect the security's price.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act¹⁰, that the proposed rule change, as amended, (File No. SR-NYSE-2001-24) is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.¹¹

Margaret H. McFarland,

Deputy Secretary.
