

withdraw the direct final rule and will address all public comments in a subsequent final rule based on this proposed rule. EPA will not institute a second comment period. Any parties interested in commenting on this action should do so at this time. Please note that if EPA receives adverse comment on an amendment, paragraph, or section of this rule and if that provision may be severed from the remainder of the rule, EPA may adopt as final those provisions of the rule that are not the subject of an adverse comment.

For additional information, see the direct final rule which is located in the Rules Section of this **Federal Register**.

Dated: September 3, 2002.

## ENVIRONMENTAL PROTECTION AGENCY

### 40 CFR Parts 52 and 81

[MA-075-7209b; A-1-FRL-7374-8]

#### Approval and Promulgation of Air Quality Implementation Plans; Massachusetts; Approval of PM10 State Implementation Plan (SIP) Revisions and Designation of Areas for Air Quality Planning Purposes

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Proposed rule.

**SUMMARY:** The EPA is proposing to approve a State Implementation Plan (SIP) revision submitted by the Commonwealth of Massachusetts. This revision replaces the standard for Total Suspended Particulates (TSP) with a standard for particulate matter with a mean aerodynamic diameter of 10 microns or less (PM10) as the National Ambient Air Quality Standard (NAAQS) for particulates. EPA also proposes to redesignate several areas of Massachusetts from "nonattainment" for TSP to "cannot be classified." In the Final Rules Section of this **Federal Register**, EPA is approving Massachusetts's SIP submittal as a direct final rule without prior proposal because the Agency views this as a noncontroversial submittal and anticipates no adverse comments. A detailed rationale for the approval is set forth in the direct final rule. If EPA receives no adverse comments in response to this action, the Agency contemplates no further activity. If EPA receives relevant adverse comments, the

Agency will withdraw the direct final rule, and will address all public comments received in a subsequent final rule based on this proposed rule. EPA will not institute a second comment period. Any parties interested in commenting on this action should do so at this time. Please note that if EPA receives adverse comment on an amendment, paragraph, or section of this rule and if that provision may be severed from the remainder of the rule, EPA may adopt as final those provisions of the rule that are not the subject of an adverse comment.

**DATES:** Written comments must be received on or before November 4, 2002.

**ADDRESSES:** Comments may be mailed to Steven Rapp, Manager, Air Permits Program Unit (mail code CAP), U.S. Environmental Protection Agency, EPA-New England, One Congress Street, Suite 1100, Boston, MA 02114-2023. Copies of the Massachusetts submittal and EPA's technical support document are available for public inspection during normal business hours, by appointment at the Office of Ecosystem Protection, U.S. Environmental Protection Agency, EPA-New England, One Congress Street, 11th floor, Boston, MA and the Division of Air Quality Control, Department of Environmental Protection, One Winter Street, 8th Floor, Boston, MA 02108.

**FOR FURTHER INFORMATION CONTACT:** Ian D. Cohen, (617) 918-1655.

**SUPPLEMENTARY INFORMATION:** For additional information, see the direct final rule which is located in the Rules Section of this **Federal Register**.

Dated: August 29, 2002.

## DEPARTMENT OF COMMERCE

### National Oceanic and Atmospheric Administration

#### 50 CFR Part 600

[I.D. 092602H]

#### Magnuson-Stevens Act Provisions; General Provisions for Domestic Fisheries; Application for Exempted Fishing Permits (EFPs)

**AGENCY:** Department of Commerce, National Oceanic and Atmospheric Administration (NOAA), National Marine Fisheries Service (NMFS).

**ACTION:** Notification of a proposal for EFPs to conduct experimental fishing; request for comments.

**SUMMARY:** The Administrator, Northeast Region, NMFS (Regional Administrator) has made a preliminary determination that the subject EFP application contains all the required information and warrants further consideration. The Regional Administrator has also made a preliminary determination that the activities authorized under the EFP would be consistent with the goals and objectives of the Northeast (NE) Multispecies Fishery Management Plan (FMP). However, further review and consultation may be necessary before a final determination is made to issue the EFP. Therefore, NMFS announces that the Regional Administrator proposes to issue an EFP that would allow one vessel to conduct fishing operations that are otherwise restricted by the regulations governing the fisheries of the Northeastern United States. The experiment proposes to conduct a study of an experimental bycatch reduction device in order to develop otter trawl gear for the NE multispecies fishery that would result in reduced catch of Atlantic cod. The EFP would allow these exemptions for one commercial vessel, for not more than 5 days of sea trials. All experimental work would be monitored by Manomet Center for Conservation Sciences personnel.

Regulations under the Magnuson-Stevens Fishery Conservation and Management Act require publication of this notification to provide interested parties the opportunity to comment on applications for proposed EFPs.

**DATES:** Comments on this document must be received on or before October 21, 2002.

**ADDRESSES:** Written comments should be sent to Patricia A. Kurkul, Regional Administrator, NMFS, Northeast Regional Office, 1 Blackburn Drive, Gloucester, MA 01930. Mark the outside of the envelope "Comments on Manomet EFP Proposal for Rigid Mesh Bycatch Reduction Device." Comments may also be sent via facsimile (fax) to 978-281-9135.

**FOR FURTHER INFORMATION CONTACT:** Tom Warren, Fishery Policy Analyst, 978-281-9347.

**SUPPLEMENTARY INFORMATION:** An application for an EFP was submitted by Manomet Center for Conservation Sciences on August 19, 2002.

The EFP would allow for exemptions from the Gulf of Maine (GOM) Regulated Mesh Area gear requirements at 50 CFR 648.80(a)(3)(i) and the days-at-sea (DAS) requirements at § 648.82(a).

The EFP would exempt one federally permitted commercial fishing vessel from the following two requirements of the FMP: The requirement to use a minimum mesh size of 6.0-inch (15.2-cm) diamond mesh or 6.5-inch (16.5-cm) square mesh in the body and extension of a trawl net while fishing in the GOM Regulated Mesh Area; and the requirement to use a DAS while targeting groundfish.

The goal of this study is to assess the utility of this bycatch reduction device for the groundfish fishery when fishing in the GOM. The specific trawl design to be tested is a rigid mesh panel inserted between the extension and codend of a trawl net and extending around the entire circumference of the net. The panel would be 2 m in length, with elongate meshes 2.4-inches (60-mm) by 7.9-inches (200-mm). The vessel would target mixed groundfish (yellowtail flounder, winter flounder, American plaice, Atlantic cod, and summer flounder). All undersized fish

would be returned to the sea as quickly as possible after measurement. The incidental catch is expected to be comprised of skates, dogfish, sculpin and sea robin. The incidental catch of these species is expected to be minimal and efforts will be made to return all incidentally caught species to the sea as quickly as possible.

The applicant requested that the research be conducted in the GOM in the area north of 42° 30' N. lat. and west of 69° 00' W. long. However, due to the severely overfished condition of the Cape Cod stock of yellowtail flounder, NMFS will confine the research to the area north of the stock boundary 42° 50' N. lat. The vessel would conduct a total of approximately 25 tows of 20 to 30 minutes duration over 5 sea days. The experimental design would be an alternate tow design (experimental net and conventional net in alternate tows, following an A-B-B-A pattern). Both codends would be constructed of 6.5" (165 mm) diamond mesh. The tows

would be recorded using a video camera in order to verify proper net functioning and to record fish behavioral reactions. Fish retained would be counted, weighed and measured, and all legal catch sold. The vessel will be exempted from 5 DAS in order to provide compensation for a portion of the cost of the research.

If the research results from the experiment are promising, the applicant intends to conduct future research to fine-tune the use of the net and conduct fleetwide trials with the hope of integrating a bycatch reduction device requirement into the FMP.

Based on the results of this EFP, this action may lead to future rulemaking.

**Authority:** 16 U.S.C. 1801 *et seq.*

Dated: September 30, 2002.
