

(approximately 175,000 industry members), however, do incur the cost of procuring (and replacing) fuel dispenser labels to comply with the Rule. According to industry input, the price per label is about thirty-eight cents. Based on ranging industry estimates of a 6–10 year useful life per dispenser label, staff will conservatively factor into its calculation of labeling cost the shortest assumed useful life, *i.e.*, 6 years. Staff believes that the average retailer has six dispensers, with all of them being obtained either simultaneously or otherwise within the same year. Assuming that, in any given year, 1/6 of all retailers (29,167 retailers) will replace their dispenser labels, staff estimates total labeling cost to be \$66,500 (29,167 × 6 × .38).
