[I.D. 082802F]

#### Endangered Species; File No. 1360

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Issuance of permit.

**SUMMARY:** Notice is hereby given that Dr. David Secor, Chesapeake Biological Laboratory, University of Maryland Center for Environmental Science, P.O. Box 38, Solomons, Maryland 20619 has been issued a permit to take shortnose sturgeon (*Acipenser brevirostrum*) for purposes of scientific research.

**ADDRESSES:** The permit and related documents are available for review upon written request or by appointment in the following office(s):

Permits, Conservation and Education Division, Office of Protected Resources, NMFS, 1315 East-West Highway, Room 13705, Silver Spring, MD 20910; phone (301)713-2289; fax (301)713-0376;

Northeast Region, NMFS, One Blackburn Drive, Gloucester, MA 01930-2298; phone (978)281-9200; fax (978)281-9371; Southeast Region, NMFS, 9721 Executive Center Drive North, St. Petersburg, FL 33702-2432; phone (727)570-5301; fax (727)570-5320.

**FOR FURTHER INFORMATION CONTACT:** Lillian Becker or Ruth Johnson, (301)713-2289.

**SUPPLEMENTARY INFORMATION:** On January 23, 2002, notice was published in the **Federal Register** (67 FR 3165) that a request for a scientific research permit to take shortnose sturgeon had been submitted by the above-named individual. The requested permit has been issued under the authority of the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*) and the regulations governing the taking, importing, and exporting of

endangered and threatened species (50 CFR parts 222–226).

The permit holder hypothesizes that the recovery of shortnose sturgeon on the Hudson River occurred due to one or several strong year-classes following nursery system recovery to normoxia after 1977. The permit holder is going to test this hypothesis by determining the ages of shortnose sturgeon caught in the Hudson river by interpreting annulus of pectoral fin spines. The method will be tested on 10 captive shortnose sturgeon from seven age classes (70 total) from US Fish and Wildlife Service Warm Springs Fish Hatchery, Georgia. The applicant will clip a 1cm section from the primary spine of one pectoral fin near the point of articulation. After this has been tested in hatchery fish, the permit holder will capture shortnose sturgeon in the Hudson River with gillnets, handle, measure, check for tags, tag, passive integrated transponder tag, sex (by external or fiberoptic examination), and release. The applicant is authorized to take 670 shortnose sturgeon.

Issuance of this permit, as required by the ESA, was based on a finding that such permit (1) was applied for in good faith, (2) will not operate to the disadvantage of the endangered species which is the subject of this permit, and (3) is consistent with the purposes and policies set forth in section 2 of the ESA.

seals (*Callorhinus ursinus*), and Pacific harbor seals (*Phoca vitulina richardsi*) for purposes of scientific research.

**DATES:** Written or telefaxed comments must be received on or before November 12, 2002.

**ADDRESSES:** The application and related documents are available for review upon written request or by appointment in the following office(s):

**FOR FURTHER INFORMATION CONTACT:**

Tammy Adams or Amy Sloan,  
(301)713–2289.

**SUPPLEMENTARY INFORMATION:** The subject permit is requested under the authority of the Marine Mammal Protection Act of 1972, as amended (MMPA; 16 U.S.C. 1361 *et seq.*), the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR part 216), and the Fur Seal Act of 1966, as amended (16 U.S.C. 1151 *et seq.*).

The applicant requests a 5 year permit to take up to 700 California sea lions, 700 northern elephant seals, 50 northern fur seals, and 550 harbor seals inhabiting Vandenberg Air Force Base and the northern Channel Islands annually by capture, sedation, blood sampling, skin biopsy, physiological measurements, hearing sensitivity tests, attachment of scientific instruments, temporary captive maintenance, recapture for retrieval of instruments, surveys of abundance and distribution, incidental harassment, and accidental mortality. The purpose of the proposed project is to study the effects of noise from rocket launches and the subsequent launch-generated sonic booms on pinnipeds. The movements and foraging behavior of seals exposed to launch noise and/or sonic booms will be compared with non-exposed control animals using remote VHF radio-telemetry, satellite transmitters, and electronic data loggers.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), an initial determination has been made that the activity proposed is categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.

Written comments or requests for a public hearing on this application should be mailed to the Chief, Permits, Conservation and Education Division,

F/PR1, Office of Protected Resources, NMFS, 1315 East-West Highway, Room 13705, Silver Spring, MD 20910. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular request would be appropriate.
