

represented by the Three Affiliated Tribes of the Fort Berthold Reservation, North Dakota.

Between 1956 and 1962, human remains representing one individual were excavated by Robert Stephenson and William Bass of the Smithsonian River Basin Surveys during legally authorized excavations at the Sully site (39SL4), Sully County, SD. The repository for these materials is the University of Nebraska State Museum, University of Nebraska-Lincoln. No known individual was identified. No associated funerary objects are present.

Based on archeological evidence, the Sully site is an earthlodge village of the Extended Coalescent period (A.D. 1550-1675). The human remains consist of a fragmentary second metatarsal. Archeological investigations and ethnohistorical data have shown that sites that are variants of the Plains Woodland, Middle Missouri, and Coalescent cultural phases in the Middle Missouri subarea of the Great Plains are ancestral to the Arikara (south) and Mandan (north) tribes, today represented by the Three Affiliated Tribes of the Fort Berthold Reservation, North Dakota.

In 1963, human remains representing one individual were excavated by J.J. Hoffman of the Smithsonian River Basin Surveys during legally authorized excavations at the La Roche site (also known as Over's) (39ST9), Stanley County, SD. The repository for these materials is the University of Nebraska State Museum, University of Nebraska-Lincoln. No known individual was identified. No associated funerary objects are present.

Based on archeological evidence, the La Roche site contains Plains Woodland (500 B.C.-A.D. 900), Initial Middle Missouri (A.D. 900-1400), and Extended Coalescent (A.D. 1550-1675) components. Archeological investigations and ethnohistorical data have shown that sites that are variants of the Plains Woodland, Middle Missouri, and Coalescent cultural phases in the Middle Missouri subarea of the Great Plains are ancestral to the Arikara (south) and Mandan (north) tribes, today represented by the Three Affiliated Tribes of the Fort Berthold Reservation, North Dakota.

Between 1964 to 1966, human remains representing a minimum of four individuals were excavated by David T. Jones of the Smithsonian River Basin Surveys during legally authorized excavations at the Ketchen site (39ST223), Stanley County, SD. The repository for these materials is the University of Nebraska State Museum, University of Nebraska-Lincoln. No

known individuals were identified. No associated funerary objects are present.

Based on archeological evidence, the Ketchen site was occupied during the Extended Coalescent period (A.D. 1550-1675). Archeological investigations and ethnohistorical data have shown that sites that are variants of the Plains Woodland, Middle Missouri, and Coalescent cultural phases in the Middle Missouri subarea of the Great Plains are ancestral to the Arikara (south) and Mandan (north) tribes, today represented by the Three Affiliated Tribes of the Fort Berthold Reservation, North Dakota.

In 1956, human remains representing one individual were excavated by David Baerreis of the University of Wisconsin for the Smithsonian River Basin Surveys during legally authorized excavations at the Spiry-Eklo site (39WW3), Walworth County, SD. The repository for these materials is the University of Nebraska State Museum, University of Nebraska-Lincoln. No known individual was identified. No associated funerary objects are present.

Based on archeological and ethnohistorical evidence, the Spiry-Eklo site is identified as a postcontact Coalescent period (A.D. 1675-1780) village. Archeological investigations and ethnohistorical data have shown that sites that are variants of the Plains Woodland, Middle Missouri, and Coalescent cultural phases in the Middle Missouri subarea of the Great Plains are ancestral to the Arikara (south) and Mandan (north) tribes, today represented by the Three Affiliated Tribes of the Fort Berthold Reservation, North Dakota.

Based on the above-mentioned information, officials of the U.S. Department of Defense, U.S. Army Corps of Engineers, Omaha District have determined that, pursuant to 43 CFR 10.2 (d)(1), the human remains listed above represent the physical remains of 21 individuals of Native American ancestry. Officials of the U.S. Department of Defense, U.S. Army Corps of Engineers, Omaha District also have determined that, pursuant to 43 CFR 10.2 (e), there is a relationship of shared group identity that can be reasonably traced between these Native American human remains and the Three Affiliated Tribes of the Fort Berthold Reservation, North Dakota.

This notice has been sent to officials of the Three Affiliated Tribes of the Fort Berthold Reservation, North Dakota. Representatives of any other Indian tribe that believes itself to be culturally affiliated with these human remains should contact Sandra Barnum, Cultural Resources, U.S. Army Corps of

Engineers, Omaha District, 215 North 17th Street, Omaha, NE 68102, telephone (402) 221-4895, before November 12, 2002. Repatriation of the human remains to the Three Affiliated Tribes of the Fort Berthold Reservation, North Dakota may begin after that date if no additional claimants come forward.

DEPARTMENT OF LABOR

Employment and Training Administration

Notice of Determinations Regarding Eligibility to Apply for Worker Adjustment Assistance and NAFTA Transitional Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974, as amended, the Department of Labor herein presents summaries of determinations regarding eligibility to apply for trade adjustment assistance for workers (TA-W) issued during the period of September, 2002.

In order for an affirmative determination to be made and a certification of eligibility to apply for worker adjustment assistance to be issued, each of the group eligibility requirements of Section 222 of the Act must be met.

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated,

(2) That sales or production, or both, of the firm or sub-division have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Negative Determinations for Worker Adjustment Assistance

In each of the following cases the investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.
