Presentation of SFA Parameter Tables
Review of Section I of the SFA Amendment Options Paper

The SFA Committee will need to review the various SFA parameter options and offer recommendations to the CFMC based on group consensus. These recommended alternatives will then be utilized to construct the table of SFA parameters for CFMC managed species.

Additionally, the SFA Committee will need to review the various alternatives regarding the aquarium trade species in the Reef Fish and Coral Fishery Management Plans, in order to produce a recommendation to the CFMC on how to pursue management of these species. This discussion will have ramifications on the generation of stock status determination criteria for these species.

Construction of SFA Parameters

The SFA Committee will need to evaluate the various biological and socio-economic data, as well as personal knowledge and experience, on all managed species and species groups, in order to recommend prudent stock status determination criteria to the CFMC. This process may, in turn drive additional management measures, based on the resulting stock status determination (i.e., approaching overfished or overfished status).
