POLICY JUSTIFICATION**Taipei Economic and Cultural Representative Office in the United States – TOW-2B Anti-Armor Guided Missiles**

Taipei Economic and Cultural Representative Office in the United States has requested a possible sale of 290 TOW-2B missiles, spare and repair parts, technical support, support equipment, personnel training and training equipment, technical data and publications, U.S. Government and contractor engineering and logistics support services, and other related elements of logistics support. The estimated cost is \$18 million.

This sale is consistent with United States law and policy as expressed in Public Law 96-8.

The recipient will use these missiles to increase its military defensive posture and will have no difficulty absorbing these additional missiles into its armed forces.

The proposed sale of this equipment and support will not affect the basic military balance in the region.

The prime contractor will be Raytheon Company in Tucson, Arizona. One or more proposed offset agreements may be related to this proposed sale.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government or contractor representatives to the recipient.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 03-01

**Notice of Proposed Issuance of Letter of Offer
Pursuant to Section 36(b)(1)
of the Arms Export Control Act, as amended**

**Annex
Item No. vii**

(vii) Sensitivity of Technology:

1. The TOW-2 Weapon System hardware and documentation provides with this proposed sale are Unclassified. However, sensitive technology is contained with the system itself. This sensitivity is primarily in the software programs, which instruct the system how to operate in the presence of countermeasures. Programs are contained in the system in the form of microprocessors with only Read out Memory maps being available, which do not provide the software program itself. The overall hardware is also considered sensitive in that the modulation frequency and infrared wavelengths could be useful in attempted countermeasure development. The benefits to be derived from this proposed sale outweigh the potential damage that could result if sensitive technology were revealed to unauthorized persons.

2. A determination has been made that the recipient can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.
