

publishes the notice of availability in the **Federal Register**.

The Forest Service and BLM believe, at this early stage, it is important to give reviewers notice of several court rulings related to public participation in the environmental review process. First, reviewers of draft EISs must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewer's position and contentions. *Vermont Yankee Nuclear Power Corp. v. NRDC*, 435 U.S. 519, 533 (1978). Also, environmental objections that could be raised at the draft EIS stage, but that are not raised until after completion of the final EIS, may be waived or dismissed by the courts. *City of Angoon v. Hodel*, 803 F.2d 1016, 1022 (9th Cir. 1986) and *Wisconsin Heritages, Inc. v. Harris*, 490 F. Supp. 1334, 1338 (E.D. Wis. 1980). Because of these court rulings, it is very important that those interested in this proposed action participate by the close of the 90-day comment period so that substantive comments and objections are made available to the Forest Service and BLM at a time when the agencies can meaningfully consider them and respond to them in the final EIS.

To assist the Forest Service and BLM in identifying and considering issues and concerns on the proposed action, comments on the draft SEIS should be as specific as possible. It is also helpful if comments refer to specific pages or chapters of the draft document. Comments may also address the adequacy of the draft SEIS or the merits of the alternatives formulated and discussed in the statement. Reviewers may wish to refer to the Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3 in addressing these points.

It is expected that the final SEIS will be filed with the EPA approximately June 2003. The Agencies anticipate there will be a Record of Decision signed in July 2003 by the four responsible officials listed above.
