

3. The requestor's areas of concern about the licensing activity that is the subject matter of the proceeding; and

4. The circumstances establishing that the request for hearing is timely—that is, filed within 30 days of the date of this notice.

In addressing how the requestor's interest may be affected by the proceeding, the request should describe the nature of the requestor's right under the Atomic Energy Act of 1954, as amended, to be made a party to the proceeding; the nature and extent of the requestor's property, financial, or other (*i.e.*, health, safety) interest in the proceeding; and the possible effect of any order that may be entered in the proceeding upon the requestor's interest.

Dated at King of Prussia, Pennsylvania, this 16th day of October, 2002.

For the Nuclear Regulatory Commission.

John D. Kinneman,

*Chief, Nuclear Materials Safety Branch,
Division of Nuclear Materials Safety, Region I.*

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Nuclear Waste; Request for Candidates

AGENCY: U.S. Nuclear Regulatory Commission.

ACTION: Notice.

SUMMARY: The U.S. Nuclear Regulatory Commission seeks qualified candidates for the Advisory Committee on Nuclear Waste. Submit resumés to: Ms. Sherry Meador, Administrative Assistant, ACRS/ACNW, Mail Stop T2E-26, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, or email address SAM@NRC.gov.

SUPPLEMENTARY INFORMATION: The Commission established the Advisory Committee on Nuclear Waste (ACNW) to provide independent technical review of and advice on matters related to the management of nuclear waste, including all aspects of nuclear waste disposal facilities, as directed by the Commission. The ACNW undertakes independent studies and reviews related to disposal, storage, and transportation of both high- and low-level radioactive waste including interim storage of spent nuclear fuel; materials safety; and facilities decommissioning. This encompasses activities related to rulemakings, associated regulatory guides, and technical positions developed to support and clarify NRC's

nuclear materials and radioactive waste regulations. Committee members are selected from a variety of engineering and scientific disciplines, such as risk assessment, chemistry, mechanical engineering, civil engineering, materials sciences, and the earth sciences. At this time, candidates are being sought who have 15–20 years of experience, including graduate level education, in the management and disposal of radioactive waste. Committee members serve a 4-year term with the possibility of reappointment for a total service of 8 years.

Criteria used to evaluate candidates include education and experience, demonstrated skills in nuclear waste management matters, and the ability to solve complex technical problems. The Commission, in selecting its Committee members, considers the need for a specific expertise to accomplish the work expected to be before the ACNW. For this position, the expertise must be directly related to the area of radioactive waste disposal, site remediation and closure activities, nuclear fuel reprocessing, chemistry, chemical exchange processes, and nuclear fuel cycle. Consistent with the requirements of the Federal Advisory Committee Act, the Commission seeks candidates with diverse backgrounds, so that the membership on the Committee will be fairly balanced in terms of the points of view represented and functions to be performed by the Committee.

Candidates for ACNW appointments may be involved in or have financial interests related to NRC-regulated aspects of the nuclear industry. Because conflict-of-interest considerations may restrict the participation of a candidate in ACNW activities, the degree and nature of any such restriction on an individual's activities as a member will be considered in the selection process. Each qualified candidate's financial interests must be reconciled with applicable Federal and NRC rules and regulations prior to final appointment. This might require divestiture of securities or discontinuance of certain contracts or grants. Information regarding these restrictions will be provided upon request.

A resumé describing the educational and professional background of the candidate, including any special accomplishments and professional references should be provided. Candidates should provide their current address, telephone number, and e-mail address. All candidates will receive careful consideration. Appointment will be made without regard to such factors as race, color, religion, national origin, sex, age, or disabilities. Candidates must

be citizens of the United States and be able to devote approximately 70–100 days per year to Committee business. Applications will be accepted until December 20, 2002.

Dated: October 17, 2002.

Andrew L. Bates,

Advisory Committee Management Officer.

NUCLEAR REGULATORY COMMISSION

[License No. 19-00915-03; Docket Number 03004530]

U.S. Department of Agriculture, Ames, IA; Environmental Assessment and Finding of No Significant Impact; Notice of Availability

AGENCY: Nuclear Regulatory Commission.

ACTION: Environmental Assessment (EA) and Finding of No Significant Impact (FONSI) for remediation of radioactive waste burial site, U.S. Department of Agriculture, Ames, IA.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is announcing the availability of the EA and FONSI for the remediation of the radioactive waste burial site at the U.S. Department of Agriculture facility in Ames, IA.

SUPPLEMENTARY INFORMATION: The Nuclear Regulatory Commission is considering amending the United States Department of Agriculture's Byproduct Materials License No. 19-00915-03 to authorize excavation and remediation of the radioactive waste burial site located at its facilities in Ames, Story County, Iowa.

1. Introduction

The U.S. Department of Agriculture (USDA) submitted a request dated August 16, 2002, for an amendment to Nuclear Regulatory Commission (NRC) License No. 19-00915-03. The licensee requests approval to decommission a radioactive waste burial site located on its property in Ames, Iowa. USDA proposes to excavate the site and retrieve the buried radioactive waste for shipment to a commercial waste disposal site in accordance with the procedures contained in that and subsequent submissions. The licensee has retained Cabrera Services, Inc., an NRC licensee (License No. 06-30556-01), to perform the decommissioning and remediation of the site.

The burial site is approximately 0.25 acre (0.1 hectare, 11,000 ft², 1000 m²) in the National Animal Disease Center
