FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[DA 02-2514, MM Docket No. 01-11, RM-10027, and RM-10322]

Radio Broadcasting Services; Arcadia, Desert Hot Springs, Fallbrook, Murrieta, and Yucca Valley, CA

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document allots Channel 281A to Murrieta, California, as a first local aural service in response to a rulemaking petition filed by Helen Jones. See 66 FR 8559, February 1, 2001. The coordinates for Channel 281A at Murrieta are 33-32-55 and 117-09-26. The document also denies a counterproposal filed by Big City Radio-LA, L.L.C., to upgrade Station KLYY(FM), Arcadia, California, from Channel 296A to Channel 296B1. To accommodate the upgrade, the counterproposal also proposed to substitute 281A for Channel 296A for Station KSYF(FM), Fallbrook California, and to downgrade, reallocate, and change the community of license of Station KYOR(FM), Channel 295B, Yucca Valley, California, to Channel 295B1 at Desert Hot Springs, California. The staff reasoned that the counterproposal could not be granted because the Commission's policies and rules do not permit pre-1964 grandfathered, short-spaced stations such as KLYY(FM) to upgrade channel class with short-spacings to stations on second or third adjacent FM channels.

DATES: Effective November 25, 2002.

Taking of Marine Mammals Incidental to Commercial Fishing Operations; Atlantic Large Whale Take Reduction Plan Regulations

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule, technical amendment.

SUMMARY: NMFS is issuing a correction to the interim final rule and final rule implementing the ALWTRP's Seasonal Area Management (SAM) and Dynamic Area Management (DAM) programs, respectively, which were published in the **Federal Register** on January 9, 2002. The purpose of this action is to correct errors in and make minor clarifications to the SAM interim final rule and to the DAM final rule. Background

This final rule modifies the Atlantic Large Whale Take Reduction Plan as deemed necessary by NMFS to satisfy requirements of the Endangered Species Act (ESA) and the Marine Mammal Protection Act (MMPA). On January 9, 2002, NMFS published a SAM interim final rule (67 FR 1142) and DAM final rule (67 FR 1133) in the **Federal Register**. The purpose of this final rule is to correct errors in and make minor clarifications in the SAM interim final rule and DAM final rule regulatory text. NMFS had discussed the SAM and DAM programs in the preambles to the SAM and DAM rules, however, some aspects of each program were inadvertently omitted from the associated regulatory text.

Corrections

NMFS noted in the preamble to the DAM proposed (66 FR 50160) and final rules (67 FR 1133) that if NMFS decides not to implement restrictions within a DAM zone, it will issue an alert to fishermen requesting that they voluntarily remove lobster trap and anchored gillnet gear from a DAM zone and asking them not to set additional gear inside it. However, NMFS inadvertently omitted this language from the regulatory text section of the DAM rule.

The new and existing SAM gear requirements discussed in the preambles to the SAM proposed and interim final rules are intended to be required in addition to existing requirements for Northern Inshore State Lobster Waters, Northern Nearshore Lobster Waters, Offshore Lobster Waters, and Other Northeast Gillnet Waters or in place of the existing requirements for those areas to the extent the SAM gear requirements conflict with them. But, text to that effect did not appear in the proposed rule's regulatory text. NMFS noted this discrepancy and intended to correct this oversight in the interim final rule. However, this clarification was also inadvertently omitted from the interim final rule's regulatory text section. Therefore, the regulations are corrected to note that the SAM gear modifications supercede requirements found at existing ALWTRP fishery specific area requirements when they are more restrictive.

The SAM interim final rule also incorrectly defined SAM East to include Point 9, 42&30' N Lat., 66°50' W Long., which is outside the Exclusive Economic Zone. This rule removes this point from the regulations and renumbers the remaining points. Also, NMFS clarifies that the gear restriction in § 229.32 (g)(4)(ii)(B) applies in SAM East. While the fact that the gear restrictions in § 229.32(g)(4)(ii)(B) apply in SAM East is clear from the structure of the regulations, NMFS is adding the words "in SAM East" for added clarity.

A number of clarifications are made to § 229.32 (g)(4)(i)(B). First, NMFS clarifies that the gear restriction in § 229.32 (g)(4)(i)(B) applies in SAM West. While the fact that the gear restrictions in § 229.32(g)(4)(i)(B) apply in SAM West is clear from the structure of the regulations, NMFS is adding the words "in SAM West" for added clarity. Second, NMFS mistakenly omitted from the regulatory text for the SAM interim final rule the following requirements: (1) buoy lines are to be composed entirely of sinking or neutrally buoyant
