

and Rims for Vehicles other than Passenger Cars, and 123 Motorcycle Controls and Displays. With respect to the latter standard, Harley-Davidson noted that the installation of a new odometer on the vehicles would trigger the odometer disclosure requirements of 49 CFR part 580. After it was accorded an opportunity to address this comment, MMI informed the agency that after the new odometer is installed, an odometer disclosure label is permanently affixed to the frame of the motorcycle. MMI further observed that the person selling the vehicle would be responsible for completing the odometer disclosure statement required by the regulations in 49 CFR part 580.

Harley-Davidson directed the bulk of its comments to the petitioner's description of modifications that would be performed to conform the vehicles to Standard No. 108 *Lamps, Reflective Devices and Associated Equipment*. The petition stated that these modifications would include: (a) Installation of U.S. model headlamp assemblies which incorporate headlamps that are certified to meet the standard; (b) replacement of all stop lamp and directional signal bulbs with bulbs that are certified to meet the standard; and (c) replacement of all lenses with lenses that are certified to meet the standard.

In its comment, Harley-Davidson stated that headlamps on vehicles manufactured for sale outside the United States may not incorporate bulbs meeting Standard No. 108. Harley-Davidson also stated that non-U.S. certified stop and directional signals contain lenses, reflectors, and bulbs that do not meet the standard, and would have to be replaced. Harley-Davidson further observed that motorcycles manufactured for sale outside the United States may incorporate amber rear side reflectors that do not meet the requirements of the standard, and be equipped with license plate brackets that do not meet the illumination requirements of the standard. In its response to these comments, MMI stated that U.S.-model headlamp assemblies, stop/tail lamp assemblies, directional signals, lenses, license plate lamps, and rear amber reflectors would be installed on the vehicles to replace any non-conforming components originally installed.

In consideration of the foregoing, NHTSA has decided to grant the petition.

Vehicle Eligibility Number for Subject Vehicles

The importer of a vehicle admissible under any final decision must indicate on the form HS-7 accompanying entry

the appropriate vehicle eligibility number indicating that the vehicle is eligible for entry. VSP-393 is the vehicle eligibility number assigned to vehicles admissible under this notice of final decision.

Final Decision

Accordingly, on the basis of the foregoing, NHTSA hereby decides that 2003 Harley Davidson FX, FL, and XL motorcycles that were not originally manufactured to comply with all applicable Federal motor vehicle safety standards are substantially similar to 2003 Harley Davidson FX, FL, and XL motorcycles originally manufactured for sale in the United States and certified under 49 U.S.C. 30115, and are capable of being readily altered to conform to all applicable Federal motor vehicle safety standards.

Authority: 49 U.S.C. 30141(a)(1)(A) and (b)(1); 49 CFR 593.8; delegations of authority at 49 CFR 1.50 and 501.8.

Issued on: October 28, 2002.
