

the proposed research to the terms of the announcement and the Department's programmatic needs. External peer reviewers are selected with regard to both their scientific expertise and the absence of conflict-of-interest issues. Non-federal reviewers may be used, and submission of an application constitutes agreement that this is acceptable to the investigator(s) and the submitting institution. Applications found to be scientifically meritorious and programmatically relevant will be selected in consultation with DOE and NASA selecting officials depending upon availability of funds in each agency's budget. In the course of the selection process, projects will be identified as addressing DOE requirements, NASA requirements, or both. The selected projects will be required to acknowledge support by one or both agencies, as appropriate, in all public communications of the research results.

The Application

(Please Note Information Below on Page Limits)

Information about the development and submission of applications, eligibility, limitations, evaluation, selection process, and other policies and procedures may be found in the Application Guide for the Office of Science Financial Assistance Program and 10 CFR part 605. Electronic access to the Guide and required forms is made available via the World Wide Web: <http://www.science.doe.gov/production/grants/guide.html>. DOE is under no obligation to pay for any costs associated with the preparation or submission of applications if an award is not made.

Adherence to type size and line spacing requirements is necessary for several reasons. No applicants should have the advantage of providing more text in their applications by using small type. Small type may also make it difficult for reviewers to read the application. Applications must have 1-inch margins at the top, bottom, and on each side. Type sizes must be 10 point or larger. Line spacing is at the discretion of the applicant but there must be no more than 6 lines per vertical inch of text. Pages should be standard 8½" × 11" (or metric A4, i.e., 210 mm × 297 mm). Applications must be written in English, with all budgets in U.S. dollars.

Applicants are asked to use the following ordered format:

- *Face Page* (DOE F 4650.2 (10–91)).
- *Project Abstract Page*; single page only, should contain:

- Title,
 - PI name,
 - Abstract text should concisely describe the overall project goal in one sentence, and limit background/significance of project to one sentence. Short descriptions of each individual aim should focus on what will actually be done
 - *Relevance Statement*; single page only, should identify DOE- or NASA-relevant research that each specific aim is intended to address.
 - *Budget pages* for each year and a summary budget page for the entire project period (using DOE F 4620.1).
 - *Budget Explanation*.
 - Budget pages and budget explanation for each collaborative subproject, if any.
 - *Project Description*, 20 pages or less, exclusive of attachments.
- Applications with Project Descriptions longer than 20 pages will be returned to applicants and will not be reviewed for scientific merit. (Project Descriptions for Glue Grants should not exceed 5 pages.) The Project Description should contain the following five parts:
- Goals,
 - Background (concisely-stated, relevant),
 - Experimental Approach,
 - Preliminary Studies (or Progress, if this is a renewal application),
 - Statistical Design and Methodologies
 - *Literature Cited*.
 - *Collaborative Arrangements* (if applicable).
 - *Biographical Sketches* (limit 2 pages per senior investigator, consistent with NIH guidelines).
 - *Facilities and Resources* description.
 - *Current and Pending Support* for each senior investigator.
 - *Letters of Intent* from collaborators (if applicable).

The Office of Science, as part of its grant regulations, requires at 10 CFR 605.11(b) that a recipient receiving a grant to perform research involving recombinant DNA molecules and/or organisms and viruses containing recombinant DNA molecules shall comply with the National Institutes of Health "Guidelines for Research Involving Recombinant DNA Molecules", which is available via the World Wide Web at: <http://www.niehs.nih.gov/odhsb/biosafe/nih/rdna-apr98.pdf>, (59 FR 34496, July 5, 1994), or such later revision of those guidelines as may be published in the **Federal Register**.

DOE requirements for reporting, protection of human and animal subjects and related special matters can

be found on the World Wide Web at: <http://www.science.doe.gov/production/grants/Welfare.html>.

The Catalog of Federal Domestic Assistance number for this program is 81.049, and the solicitation control number is ERFAP 10 CFR part 605.
