RIN 2060-AK34

National Emission Standards for Hazardous Air Pollutants: Revision of Source Category List for Standards Under Section 112(c)(6) and 112(k) of the Clean Air Act

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of revisions to the area source category list and inventory.

SUMMARY: This notice removes five area source categories of hazardous air pollutants (HAP) (*i.e.*, asphalt hot-mix production, fabricated metal products, paint and allied products, paper coated and laminated, packaging and transportation equipment manufacturing) from the list developed under section 112(c)(6) of the Clean Air

Act (CAA). It also removes an additional area source category, Open Burning of Scrap Tires, from the anthropogenic stationary source categories included in the inventory analysis for section 112(c)(6) and 112(k). Consequently, that source category will no longer be a candidate for regulation under either section 112(c)(6) or 112(k). The revisions in this notice have not been reflected in any previous notices and are being made without public comment on the Administrator's own motion. Such revisions are deemed by EPA to be without need for public comment based on the nature of the actions.

EFFECTIVE DATE: November 8, 2002.

ADDRESSES: The official public docket is the collection of materials that is available for public viewing at the EPA Docket Center, (EPA/DC) EPA West, Room B102, 1301 Constitution Ave., NW., Washington, DC.

I. Revisions to the Section 112(c)(6) Source Category List

A. What Is the History of the Source Category List for the Seven HAP Specified Under Section 112(c)(6)?

Section 112(c)(6) of the CAA instructs us to list categories and subcategories of sources to assure that sources accounting for not less than 90 percent of the aggregated emissions of each of seven specific HAP (alkylated lead compounds, polycyclic organic matter (POM), hexachlorobenzene (HCB), mercury, polychlorinated biphenyls, 2,3,7,8-tetrachlorodibenzofurans (TCDF) and 2,3,7,8-tetrachlorodibenz-p-dioxin (TCDD)) are subject to standards under section 112(d)(2) or (d)(4). The EPA published a list of categories for section 112(d)(2) rulemaking pursuant to section 112(c)(6) on April 10, 1998 (63 FR 17838). In the April 1998 **Federal Register** notice, we provided a summary table of 1990 emissions inventory data for known sources of the seven specific HAP titled "Summary of 1990 Emission Inventory Data for Section 112(c)(6) Pollutants (tons/yr)." Emissions inventories consist of estimates of annual emissions to the air from all the sources for which data are available such as power plants, chemical plants, automobiles, and wildfires. Using these inventory data, we identified the sources of the total emissions of these seven HAP. However, we did not further evaluate certain types of sources that are not considered appropriate for section 112 regulation. The sources excluded
