Decision Process: Availability of the draft EIS for review and written comment will be announced in the **Federal Register** notice, as well as local and regional news media, GGNRA website, and via direct mailing to the project mailing list. At this time, the draft EIS is anticipated to be available for public review in the first quarter of the year 2004. To ensure further opportunity to comment on the draft EIS after it is distributed, additional public meetings will be held (dates and locations to be determined). Notice of the availability of the final EIS likewise will be published in the **Federal Register**. As a delegated EIS, the official responsible for the final NEPA decision is the Regional Director, Pacific West Region. Subsequently, the official responsible for implementing the selected Plan would be the Superintendent, Golden Gate National Recreation Area.

Dated: August 21, 2002.

Arthur E. Eck,

Acting Regional Director, Pacific West Region.

Notice of Inventory Completion: Oregon State Museum of Anthropology, University of Oregon, Eugene, Oregon and U.S. Department of the Interior, National Park Service, Whitman Mission National Historic Site, Walla Walla, WA

AGENCY: National Park Service, Interior.

ACTION: Notice.

Notice is here given in accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. 3003, Sec. 5, of the completion of an inventory of human remains in the possession of Oregon State Museum of Anthropology, University of Oregon, Eugene, Oregon and in the control of U.S. Department of the Interior, National Park Service, Whitman Mission National Historic

Site, Walla Walla, WA. These human remains were removed from a burial site at Whitman Mission National Historic Site.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 25 U.S.C. 3003, Sec. 5 (d)(3). The determinations within this notice are the sole responsibility of the National Park unit that has control of these Native American human remains. The Manager, National NAGPRA Program is not responsible for the determinations within this notice.

A detailed assessment of the human remains was made by National Park Service and Oregon State Museum of Anthropology professional staff and an expert on aboriginal burial practices in the Plateau culture area of North America in consultation with representatives of the Confederated Tribes of the Umatilla Reservation, Oregon.

In October 1960, human remains representing a minimum of one individual were removed from a burial at Whitman Mission National Historic Site in Walla Walla, Washington during legally authorized excavations by NPS archeologist Paul Schumacher. The human skeletal remains had been in a flexed position and were thought to be the remains of a Native American. They were removed from the burial site at Whitman Mission and delivered to University of Oregon where they were inspected and described by David L. Cole in November 1960. The skeletal remains were confirmed to be those of a Native American woman who had been between 50 and 60 years of age at the time of death. No known individuals were identified. No funerary objects are present. To honor the request of the Confederated Tribes of the Umatilla Reservation, Oregon these human remains continue to be in the possession of the Oregon State Museum of Anthropology, University of Oregon.

All available documentation on the human remains from the NPS, including an archival photograph of the skeletal remains in situ, and from the University of Oregon was submitted to Professor Roderick Sprague, an expert on aboriginal burial practices in the Plateau culture area of North America with over 40 years of professional experience, for his review and assessment. On the basis of both the flexed position of the burial and the absence of grave goods, Dr. Sprague concluded that this set of human remains dates to the protohistoric period of from A.D. 1700-1800.

Whitman Mission National Historic Site commemorates the history of a
