

NATIONAL SCIENCE FOUNDATION**Sunshine Act Meeting Notice**

AGENCY HOLDING MEETING: National Science Foundation, National Science Board.

DATE AND TIME: November 21, 2002: 11 a.m.–11:15 a.m.—Closed Session; November 21, 2002: 11:15 a.m.–11:30 a.m.—Closed Session; November 21, 2002: 12 noon–3:30 p.m. Open Session.

PLACE: The National Science Foundation, Room 1235, 4201 Wilson Boulevard, Arlington, VA 22230, <http://www.nsf.gov/nsb>.

STATUS: Part of this meeting will be closed to the public. Part of this meeting will be open to the public.

MATTERS TO BE CONSIDERED:**Thursday, November 21, 2002**

Executive Closed Session (11 a.m.–11:15 a.m.)

Closed Session Minutes, October, 2002.

Closed Session (11:15 a.m.–11:30 a.m.)

Awards and Agreements.

Open Session (12 Noon–3:30 p.m.)

Science Presentations

—Geosciences

—Mathematical and Physical Sciences

Open Session Minutes, October 2002

Closed Session Items for February 2003

NUCLEAR REGULATORY COMMISSION**Agency Information Collection**

Activities: Submission for the Office of Management and Budget (OMB) Review; Comment Request

AGENCY: Nuclear Regulatory Commission (NRC).

ACTION: Notice of the OMB review of information collection and solicitation of public comment.

SUMMARY: The NRC has recently submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35). The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

1. *Type of submission, new, revision, or extension:* Extension.

2. *The title of the information collection:* NRC Form 396, "Certification of Medical Examination by Facility Licensee".

3. *The form number if applicable:* NRC Form 396.

4. *How often the collection is required:* Upon application for an initial operator license, every six years for the renewal of operator or senior operator license, and upon notices of disability.

5. *Who will be required or asked to report:* Facility licensees who are tasked with certifying the medical fitness of an applicant or licensee.

6. *An estimate of the number of responses:* 1,240 (1,100 responses plus 140 recordkeepers).

7. *The estimated number of annual respondents:* 140.

8. *An estimate of the total number of hours needed annually to complete the requirement or request:* 751 (275 hours for reporting [.25 hours per response] and 476 hours for recordkeeping [3.4 hours per recordkeeper]).

9. *An indication of whether Section 3507(d), Public Law 104–13 applies:* Not applicable.

10. *Abstract:* NRC Form 396 is used to transmit information to the NRC regarding the medical condition of applicants for initial operator licenses or renewal of operator licenses and for the maintenance of medical records for all licensed operators. The information is used to determine whether the physical condition and general health of applicants for operator licensees is such that the applicant would not be expected to cause operational errors and endanger public health and safety.

A copy of the final supporting statement may be viewed free of charge at the NRC Public Document Room, One White Flint North, 11555 Rockville Pike, Room O–1 F23, Rockville, MD 20852. OMB clearance requests are available at the NRC worldwide Web site: <http://www.nrc.gov/public-involve/doc-comment/omb/index.html>. The document will be available on the NRC home page site for 60 days after the signature date of this notice.

Comments and questions should be directed to the OMB reviewer listed below by December 16, 2002. Comments received after this date will be considered if it is practical to do so, but assurance of consideration cannot be given to comments received after this date. Bryon Allen, Office of Information and Regulatory Affairs (3150–0024), NEOB–10202, Office of Management and Budget, Washington, DC 20503.

Comments can also be submitted by telephone at (202) 395–3087.

The NRC Clearance Officer is Brenda Jo. Shelton, 301–415–7233.

Dated at Rockville, Maryland, this 7th day of November 2002.

For the Nuclear Regulatory Commission.

Brenda Jo. Shelton,

NRC Clearance Officer, Office of the Chief Information Officer.

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[Docket No. 50–443]

North Atlantic Energy Service Corporation; Notice of Partial Withdrawal of Application for Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has granted the request of North Atlantic Energy Service Corporation (the licensee) to withdraw a portion of its August 9, 2001, application for proposed amendment to Facility Operating License No. NPF–86 for the Seabrook Station, Unit No. 1, located in Rockingham County, New Hampshire.

The withdrawn portion of the proposed amendment would have revised the Seabrook Station, Unit No. 1, Technical Specifications (TSs) to relocate TS 3/4.9.3, "Decay Time," to the Seabrook Station Technical Requirements Manual.

The Commission had previously issued a Notice of Consideration of Issuance of Amendment published in the **Federal Register** on September 19, 2001 (66 FR 48290). However, by letters dated June 24, 2002, and October 14, 2002, the licensee withdrew this portion of the proposed change as discussed above.

For further details with respect to this action, see the application for amendment dated August 9, 2001, as supplemented September 17, 2001, and the licensee's letters dated June 24, 2002, and October 14, 2002, which withdrew a portion of the application

for license amendment. Documents may be examined, and/or copied for a fee, at the NRC's Public Document Room (PDR), located at One White Flint North, 11555 Rockville Pike (first floor), Rockville, Maryland. Publicly available records will be accessible electronically from the Agencywide Documents Access and Management Systems (ADAMS) Public Electronic Reading Room on the internet at the NRC Web site, <http://www.nrc.gov/reading-rm/adams/html>. Persons who do not have access to ADAMS or who encounter problems in accessing the documents located in ADAMS, should contact the NRC PDR Reference staff by telephone at 1-800-397-4209, or 301-415-4737 or by e-mail to pdrr@nrc.gov.

Dated at Rockville, Maryland, this 8th day of November, 2002.

For the Nuclear Regulatory Commission.

Robert D. Starkey,

Project Manager, Section 2, Project Directorate 1, Division of Licensing Project Management, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-335 and 50-389]

Florida Power and Light Company, et al., St. Lucie, Units 1 and 2; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (NRC) is considering issuance of an exemption from Title 10 of the CFR, part 54, section 54.21(b), for Facility Operating License Nos. DPR-67 and NPF-16, issued to Florida Power & Light Company, *et al.* (the licensee), for operation of St. Lucie, Units 1 and 2, located in St. Lucie County, Florida.

Environmental Assessment

Identification of the Proposed Action

The proposed action would exempt the licensee from the requirement of 10 CFR 54.21(b), which specifies that an applicant (for the purposes of license renewal, the licensee is the applicant) must submit, each year following submittal of the license renewal application (LRA), and at least three months before scheduled completion of the NRC review, amendments to the renewal application that identify any change to the current licensing basis (CLB) of the facility that materially affects the contents of the LRA, including the final safety analysis report (FSAR) supplement.

The NRC staff initiated the proposed action on its own initiative.

The Need for the Proposed Action

In accordance with 10 CFR 54.21(b), the applicant is required to submit an LRA amendment by November 29, 2002, which is one year after the applicant submitted the application, and a second LRA amendment before April 3, 2003, which is three months prior to the scheduled completion of the NRC review. The exemption would allow the applicant to submit a single LRA amendment three months prior to the scheduled completion of the NRC review. The proposed action will reduce the burden on the staff and applicant associated with submitting two LRA amendments in a four month period.

Environmental Impacts of the Proposed Action

The exemption, if granted, will permit the applicant to prepare and submit a single LRA amendment at least three months prior to the scheduled completion of the NRC review. In short, granting of the exemption will not necessitate, or lead to, changes to the as-built plant design, or to existing procedures at St. Lucie, Units 1 and 2.

The staff evaluated potential radiological environmental impacts associated with the exemption. Since no plant design nor procedure changes will be made, no new accident causal mechanisms would be introduced.

The proposed action will not significantly increase the probability or consequences of accidents, no changes are being made in the types of any effluents that may be released off site, and there is no significant increase in occupational or public radiation exposure. Therefore, there are no significant radiological environmental impacts associated with the proposed action.

With regard to the potential nonradiological impacts, the proposed action does not affect any historic sites. The proposed action involves no plant design nor procedure changes, it does not increase or decrease nonradiological plant effluents, and has no other environmental impact from those previously evaluated by the staff in the final environmental statement (FES). Therefore, there are no significant nonradiological environmental impacts associated with the proposed action.

Accordingly, the NRC concludes that there are no significant environmental impacts associated with the proposed action.

Alternatives to the Proposed Action

As an alternative to the proposed action, the staff considered not issuing the exemption (*i.e.*, the "no-action" alternative). Denial of the application would result in no change in current environmental impacts. The environmental impacts of the proposed action and the alternative action are similar.

Alternative Use of Resources

This action does not involve the use of any resources not previously considered in the FES, for the St. Lucie Plant (NUREG-0842).

Agencies and Persons Contacted

In accordance with its stated policy, on October 8, 2002, the staff consulted with Florida State official, William Passetti, Bureau of Radiation Control, regarding the environmental impact of the proposed action. The State official had no comments or objections.

Finding of No Significant Impact

On the basis of the environmental assessment, the NRC concludes that the proposed action will not have a significant effect on the quality of the human environment. Accordingly, the NRC has determined not to prepare an environmental impact statement for the proposed action.

For further details with respect to the proposed action, see the LRA for St. Lucie, Units 1 and 2. Documents may be examined, and/or copied for a fee, at the NRC's Public Document Room (PDR), located at One White Flint North, 11555 Rockville Pike (first floor), Rockville, Maryland. Publicly available records will be accessible electronically from the Agencywide Documents Access and Management System (ADAMS). The ADAMS Public Electronic Reading Room is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/ADAMS.html>. Persons who do not have access to ADAMS or who encounter problems in accessing the documents located in ADAMS, should contact the NRC's PDR reference staff at 1-800-397-4229, 301-415-4737, or by e-mail to PDRR@NRC.gov.

Dated at Rockville, Maryland, this 6th day of November, 2002.

For the Nuclear Regulatory Commission.

Samson Lee,

Chief, License Renewal Section, License Renewal and Environmental Impacts Program, Division of Regulatory Improvement Programs, Office of Nuclear Reactor Regulation.
