**SUPPLEMENTARY INFORMATION:** On June 27, 2002, notice was published in the *Federal Register* (67 FR 43283) that requests for scientific research permits and permit amendments to take Steller sea lions had been submitted by the above-named individuals/organizations. The requested permits and permit amendments have been issued under the authority of the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 *et seq.*), the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR part 216), the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*), the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR parts 222-226), and the Fur Seal Act of 1966, as amended (16 U.S.C. 1151 *et seq.*).

Permit No. 358-1564-02, which expires on June 30, 2005, authorized the permit holder to take Steller sea lions of all ages and both sexes in Alaska and British Columbia by aerial/boat surveys, capturing, handling, flipper tagging, blood/biopsy sampling, hot-branding, collection of blood and tissue samples, attachment of scientific instruments, recaptures, and accidental mortality. The amended permit authorizes takes of additional sea lions by increased frequency of aerial surveys, and additional takes of individual sea lions by additional recaptures, increased blood and tissue sampling, tagging, administering Evans blue dye, and additional accidental mortality.

Permit No. 782-1532, which expires on December 31, 2004, authorizes the permit holder to take Steller sea lions of

all ages and both sexes in Alaska, by aerial/boat surveys, capturing, handling, flipper tagging, blood/biopsy sampling, attachment of scientific instruments, and hot-branding. The amended permit increase the frequency of takes by aerial surveys; includes Southeast Alaska in monthly surveys; increases the number of animals to be incidentally harassed during scat collection; and allows additional procedures for animals already authorized for capture, including using gas anesthesia, branding of any animal captured, injecting Evan's blue dye and deuterated water, collecting additional blood and tissue samples, using bioelectric impedance analysis, and an increase in the number of accidental mortalities.

Permit No. 800-1664 authorizes takes of threatened and endangered juvenile and adult female Steller sea lions in Alaska by capture, anesthesia, hot-branding, tissue sampling (including blood, skin, and blubber), attachment of scientific instruments (video system/data logger and satellite transmitters), and accidental mortality.

Permit No. 1016-1641 authorizes takes of threatened and endangered Steller sea lions in the Aleutian Islands, Gulf of Alaska, and southeast Alaska by remote biopsy darting, incidental harassment, and accidental mortality, to collect blubber samples for analysis to assess prey selection. Some samples will be exported to Canada for analysis. Northern fur seals (*Callorhinus ursinus*) and harbor seals (*Phoca vitulina richardsi*) may be incidentally harassed during biopsy sampling.

Permit No. 434-1669 authorizes takes of threatened Steller sea lions in California, Washington, and Oregon by capture, hot-branding, flipper tagging, collection of blood and tissue samples from, attachment external scientific instruments to, harassment incidental to these activities and remote monitoring, and accidental mortality.

Permit No. 881-1668, issued to the Alaska SeaLife Center, authorizes takes of threatened and endangered Steller sea lions in Alaska by capture, hot-branding, flipper tagging, collection of blood and tissue samples from, attachment of external scientific instruments, accidental mortality, and harassment incidental to these activities and remote monitoring.

Permit No. 1010-1641 authorizes takes of Steller sea lions of all ages by harassment during aerial surveys and vessel-based behavioral observations in the western Gulf of Alaska, and scat collection at rookeries and haulouts along the Alaska Peninsula and Eastern Aleutian Islands.

Issuance of these permits and permit amendments, as required by the ESA, was based on a finding that the permits (1) were applied for in good faith, (2) will not operate to the disadvantage of the endangered species which is the subject of these permits, and (3) is consistent with the purposes and policies set forth in section 2 of the ESA.

**SUPPLEMENTARY INFORMATION:** The subject amendment to Permit No. 821-1588-01 is requested under the authority of the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 *et seq.*), and the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR part 216).

Permit No. 821-1588-01 authorizes the permit holder to conduct research under three projects: (1) capture, tag, sample, release Weddell seals (*Leptonychotes weddelli*) on McMurdo Sound, Antarctica; (2) approach, tag, biopsy, photograph sperm whales (*Physeter macrocephalus*) in the Gulf of Mexico, and conduct research activities on Odontocetes that may result in Level B harassment; and (3) import/export marine mammal specimens obtained from dead animals. The permit holder requests authorization to take up to two times each, 30 adult female northern elephant seals (*Mirounga angustirostris*) and 10 subadult seals of either sex during each of three years by capture, restraint, sedation, attachment of instruments, placement of catheters into blood vessels, placement of subcutaneous temperature and intravenous oxygen sensors, and taking muscle biopsies. Adult females may be pregnant, although no late-term pregnant seals will be sampled. Level B harassment may occur on an additional 40 seals per year during observations to check flipper tags for identification. Up to two accidental mortalities per year are requested for this amendment. Research will occur at Ano Nuevo Point, California. The purpose of this research is to investigate the behavioral and energetic adaptations that enable elephant seals to forage at depth in the northern Pacific Ocean.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), an initial determination has been made that the activity proposed is categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.

Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding copies of this application to the Marine Mammal Commission and its Committee of Scientific Advisors.
