

Dated: November 15, 2002.

Richard W. Moreland,

Acting Assistant Secretary for Import Administration.

APPENDIX

List of Issues

1. Use of New Surrogate Value Information for Aniline and Sulfuric Acid
2. Supplementing or Adjusting New Surrogate Value Information for Aniline and Sulfuric Acid

Applications for Duty-Free Entry of Scientific Instruments

Pursuant to section 6(c) of the Educational, Scientific and Cultural Materials Importation Act of 1966 (Pub. L. 89-651; 80 Stat. 897; 15 CFR part 301), we invite comments on the question of whether instruments of equivalent scientific value, for the purposes for which the instruments shown below are intended to be used, are being manufactured in the United States.

Comments must comply with 15 CFR 301.5(a)(3) and (4) of the regulations and be filed within 20 days with the Statutory Import Programs Staff, U.S. Department of Commerce, Washington, DC 20230. Applications may be examined between 8:30 a.m. and 5 p.m. in Suite 4100W, U.S. Department of Commerce, Franklin Court Building, 1099 14th Street, NW., Washington, DC.

Docket Number: 02-044. Applicant: Dartmouth College, 6015 McNutt, Room 104, Hanover, NH 03755. Instrument: Electron Microscope, Model JEM-1010. Manufacturer: JEOL Ltd., Japan.

Intended Use: The instrument is intended to be used to study the basic principles of chromosome movement during cell division. Cells are grown in culture and at precise times during the cell cycle they are chemically fixed and embedded in acrylic polymer plastic. The cells are then cut into very thin sections and used to examine very fine mechanistic aspects of chromosome attachment to the spindle, the structure responsible for chromosome movement. Application accepted by Commissioner of Customs: September 27, 2002.

Docket Number: 02-046. Applicant: Brandeis University, Rosenstiel

Research Center (MS-029), 415 South Street, Waltham, MA 02454-9114.

Instrument: Electron Microscope, Model Tecnai F30 TWIN. Manufacturer: FEI Company, The Netherlands. Intended Use: The instrument is intended to be used to study biological assemblies of proteins and collect images of these complexes which are then analyzed by computer to determine three-dimensional structures. Electron scattering and image formation will also be studied. Application accepted by Commissioner of Customs: October 31, 2002.

Gerald A. Zerdy,

Program Manager, Statutory Import Programs Staff.

The Pennsylvania State University; Notice of Decision on Application for Duty-Free Entry of Scientific Instrument

This decision is made pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897; 15 CFR part 301). Related records can be viewed between 8:30 AM and 5 PM in Suite 4100W, Franklin Court Building, U.S. Department of Commerce, 1099 14th Street, NW., Washington, DC.

Docket Number: 02-042. Applicant: The Pennsylvania State University, University Park, PA 16802. Instrument: Plate Filler, Model QFill2. Manufacturer: Genetix Limited, United Kingdom. Intended Use: See notice at 67 FR 64097, October 17, 2002.

Comments: None received. Decision: Approved. No instrument of equivalent scientific value to the foreign instrument, for such purposes as it is intended to be used, is being manufactured in the United States. Reasons: This is a compatible accessory for an existing instrument purchased for the use of the applicant. The accessory is pertinent to the intended uses and we know of no domestic accessory which can be readily adapted to the previously imported instrument.

Gerald A. Zerdy,

Program Manager, Statutory Import Programs Staff.

The Pennsylvania State University; Notice of Decision on Application for Duty-Free Entry of Scientific Instrument

This decision is made pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897; 15 CFR part 301). Related records can be viewed between 8:30 A.M. and 5 P.M. in Suite 4100W, U.S. Department of Commerce, Franklin Court Building, 1099 14th Street, NW., Washington, DC.

Docket Number: 02-043. Applicant: The Pennsylvania State University, University Park, PA 16802. Instrument: Colony Picking/Arraying Robot, Model Q PixII. Manufacturer: Genetix Limited, United Kingdom. Intended Use: See notice at 67 FR 64097, October 17, 2002.

Comments: None received. Decision: Approved. No instrument of equivalent scientific value to the foreign instrument, for such purposes as it is intended to be used, is being manufactured in the United States. Reasons: The foreign instrument provides: a unique multi-tasking robotic system for both picking and spotting as well as arraying specific cell colonies with a rapid picking rate of 3500 colonies per hour and the very high throughput required for large scale gene sequencing projects. The National Institutes of Health advises in its memorandum of October 7, 2002 that (1) this capability is pertinent to the applicant's intended purpose and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign instrument for the applicant's intended use.

We know of no other instrument or apparatus of equivalent scientific value to the foreign instrument which is being manufactured in the United States.

Gerald A. Zerdy,

Program Manager, Statutory Import Programs Staff.
