2	FGD Enhancement	All coals types or blends with wet FGD.	1.
3	Oxidation Systems	All coals or blends applicable to plants with or without wet FGD	1 or 2.
4	Other	All coals individually or blends and all existing equipment configurations	1 or 2.

1. Full-scale (minimum 100 MWe).
2. Slip-stream (minimum 10 MWe).

Scale of Testing

DOE anticipates allocating \$1.5 million or less in cost sharing per test site. DOE recognizes that certain mercury control technologies proposed for full-scale testing may require significant outlays for capital equipment in order to be tested. Given that the funding available for this solicitation is limited and is to be used primarily for testing and evaluation of the performance of the proposed technology and not for the purchase of equipment, DOE is allowing for slip-stream testing of technologies under Topic Areas 3 and 4. However, if the offeror wants to test at full scale, then they would be required to cover the additional costs above DOE threshold of \$1.5 million per test site (or 75% cost sharing, whichever is less). DOE anticipates that funds will be approximately allocated as 2/3 to full-scale testing and 1/3 to pilot-scale testing.

It is anticipated that there will be 9–12 Financial Assistance (Cooperative Agreements) awards with performance periods ranging from 12–42 months. The total estimated Award Value for all projects awarded under this solicitation is estimated at \$19–\$25 million with total federal funding anticipated between \$15–\$20 million with a required recipient cost sharing of 25% of total cost.

Eligibility for participation in this Program Solicitation is considered to be full and open. All interested parties may apply. The solicitation will contain a complete description of the evaluation factors and the relative importance of each factor. Applications submitted by or on behalf of (1) Another Federal agency; (2) a Federally Funded Research and Development Center sponsored by another Federal agency; or (3) a Department of Energy (DOE)

Management Operating (M&O) contractor will not be eligible for award under this solicitation. However, an application that includes performance of a portion of the work by a DOE M&O contractor will be evaluated and may be considered for award subject to the provisions to be set forth in Program Solicitation DE–PS26–03NT41718.

Once released, the solicitation will be available for downloading from the IIPS Internet page. At this Internet site you will also be able to register with IIPS, enabling you to submit an application.
