The requested permit has been issued under the authority of the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*), and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR parts 222-226).

The permit authorizes annual takes of 150 juvenile and subadult green turtles, 100 juvenile and sub-adult loggerhead, 150 juvenile and sub-adult Kemp's ridley, and 5 juvenile and sub-adult hawksbill turtles by capture, tagging, blood and tissue sampling for a five year population assessment of the juvenile sea turtles inhabiting Charlotte Harbor on the west coast of Florida. Up to 10 green, 10 Kemp's ridley, 10 loggerhead, and 5 hawksbill turtles will also be collected annually incidental to the Center for Shark Research gill netting for sharks in the areas of Pine Island Sound and the Gulf waters near Crystal River, FL. These turtles will be measured, flipper tagged and released. In the second through fifth years of the permit, up to 5 green and/or Kemp's ridley turtles will also have satellite tags attached.

Issuance of this permit, as required by the ESA, was based on a finding that such permit (1) was applied for in good faith, (2) will not operate to the disadvantage of the endangered species which is the subject of this permit, and (3) is consistent with the purposes and policies set forth in section 2 of the ESA.
