Title; Associated Form; and OMB Number: TRICARE Employee Survey (TRES)

Needs and Uses: the objective of this work is to provide the Department of Defense leadership with feedback from civilian and Military Healthcare System employees who work at Military Treatment Facilities (MTF) CONUS-wide. A supportive internal environment enhances employee performance, motivation, and commitment, which in turn enhance the quality of delivered healthcare. Understanding the level of employee commitment and employees' attitudes toward the things that drive that commitment will help identify organizational factors needing improvement. The goal of this work is to gain insight from MHS employees working within the direct care system about their attitudes, experiences and opinions of workplace structures and procedures. All employees of CONUS MTFs will be eligible to participate. By reporting on their experience with, and perceptions of, their organization and immediate work environment, they can identify factors that enable or hinder them from providing high quality care. The TRES intended to provide DoD with data that contributes to the delivery of high quality healthcare. The perspective of employees has not been collected systematically despite their important role in delivering care within the constraints of limited resources and complicated guidelines. The first goal of this work is to gain insight of employees regarding the challenges associated with treating patients under TRICARE. A
