SUPPLEMENTARY INFORMATION:

I. Background

The Department of the Interior and Related Agencies Appropriations Act of 2002 allocated \$40 million from the Land and Water Conservation Fund for conservation grants to States, the District of Columbia, Puerto Rico, Guam, the United States Virgin Islands, the Northern Mariana Islands, American Samoa, States and Tribes under the Landowner Incentive Program. The U.S. Fish and Wildlife Service (Service) herein proposes the implementation guidance for the \$4 million tribal component of the Landowner Incentive Program.

In recent years, natural resource managers have increasingly recognized that private lands play a pivotal role in linking or providing important habitats for fish, wildlife, and plant species. To protect and enhance these habitats through incentives for private landowners, Congress appropriated \$40 million for the Service to administer a new Landowner Incentive Program (LIP) for States and tribes. The Service will award grants to States for actions and activities that protect and restore habitats that benefit Federally listed, proposed or candidate species, or other at-risk species on private lands. A primary objective of LIP is to establish, or supplement existing, landowner incentive programs that provide technical and financial assistance, including habitat protection and restoration, to private landowners for the protection and management of habitat to benefit Federally listed, proposed, or candidate species, or other at-risk species on private lands as stated in the appropriations language. LIP complements other Federal private lands conservation programs that focus on the conservation of habitat.

The Service is providing guidance to the public and, particularly, to federally-recognized tribes, in the administration of this \$4 million Tribal Landowner Incentive Program (T-LIP). T-LIP will provide conservation monies to federally recognized tribes for actions and activities that protect and restore habitats that benefit Federally listed, proposed, or candidate species, or other at-risk species on tribal lands. T-LIP was created because of the unique relationship between the Federal government and tribes and because tribal lands are not private lands and
