SUPPLEMENTARY INFORMATION: Under the authority of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980 as amended, commonly known as Superfund, (42 U.S.C. 9601 *et seq.*). “* * * [Trustees] may assess damages to natural resources resulting from a discharge of oil or a release of a hazardous substance * * * and may seek to recover those damages.” Natural resource damage assessments are separate from the cleanup actions undertaken at a hazardous waste site, and provide a process whereby the Trustees can determine the proper compensation to the public for injury to natural resources.

Three natural resource trustees settled with the Potentially Responsible Parties for injuries to natural resources due to releases of hazardous substances from the Charles George Landfill Superfund Site: DOI recovered \$299,916 for injuries to migratory birds that use wetlands; National Oceanic Atmospheric Administration recovered \$134,624 for potential injuries to anadromous and catadromous fish in the Merrimack River; and the Commonwealth of Massachusetts recovered \$918,900 for injuries to wetlands and groundwater. The total recovery of damages and future oversight expenses for all the Trustees was \$1,353,440. The three Trustees signed a memorandum of Agreement (MOA) in recognition of the common interests to restore, replace and/or acquire the equivalent natural resources
