

prevention efforts, and to address questions about the safety of pipelines, research and development, and other program activities.

Session 2 will address pipeline performance metrics and will include a discussion on performance tracking and monitoring initiatives, RSPA/OPS data initiatives, and concepts in performance metrics on both a per company and industry aggregate basis. Panelists will discuss indicators that would be useful to judge the safety and reliability of a specific operator's program and the pipeline industry as a whole.

Session 3 will focus on adequacy of an initiative to develop a national consensus standard for pipeline operators to use in developing public awareness programs. This standard has been developed by the oil and gas industry and observed by OPS and NAPSR. This consensus standard, American Petroleum Institute Recommended Practice 1162 ("RP 1162"), and additional information on the project can be viewed on the following Internet Web Site: <http://www.api.org/pipelinepublicawareness>. RSPA/OPS is particularly interested in hearing the public's views on the completeness of RP 1162's sections on the information provided to local officials and on effectiveness measures. The session will also address additional RSPA/OPS communication initiatives, the development of RSPA/OPS online source of information about pipelines ("Pipeline 101"), the National Pipeline Mapping System, a collaborative project with the National Association of State Fire Marshals to develop a first responder training program, and a project with the National Academy of Science/Transportation Research Board on the study of measures to prevent encroachment on pipelines.

All presentations and a meeting transcript will be available subsequent to the meeting in the docket at <http://dms.dot.gov> as well as at <http://primis.rspa.dot.gov>.

Issued in Washington, DC, on December 27, 2002.

Stacey L. Gerard,

Associate Administrator for Pipeline Safety.
