SUPPLEMENTARY INFORMATION:

Background

Codex was established in 1962 by two United Nations organizations, the Food and Agriculture Organization (FAO) and the World Health Organization (WHO). Codex is the major international organization for protecting the health and economic interests of consumers and encouraging fair international trade in food. Through adoption of food standards, codes of practice, and other guidelines developed by its committees,

and by promoting their adoption and implementation by governments, Codex seeks to ensure that the world's food supply is sound, wholesome, free from adulteration, and correctly labeled. In the United States, USDA, FDA, and EPA manage and carry out U.S. Codex activities.

The Codex Committee on Food Additives and Contaminants establishes or endorses maximum or guideline levels for individual food additives, for contaminants (including environmental contaminants), and for naturally occurring toxicants in foodstuffs and animal feeds. In addition the Committee prepares priority lists of food additives and contaminants for toxicological evaluation by the Joint FAO/WHO Expert Committee on Food Additives; recommends specifications of identity and purity for food additives for adoption by the Commission; considers methods of analysis for the determination of food additives and contaminants in food; and considers and elaborates standards or codes for related subjects such as the labelling of food additives when sold as such, and food irradiation. The Committee is chaired by The Netherlands.
