

us with any information on their direct costs of carrying passengers on a space-available basis pursuant to section 145.

Notwithstanding our public invitation to all affected parties, there is no evidence in any of the comments submitted to us indicating that our suggested charge of \$25.00 each way to accommodate passengers under section 145 is unreasonable. As we informally made clear to every carrier that inquired at the outset, and as is plain from our November 14 notice requesting comments on the cost issue, we understand that costs may vary by carrier. We also agree with the commenters who suggested that the cost to a particular carrier of complying with section 145 may be affected by a variety of factors, including the number of passengers, the current fuel costs to carriers, and the markets and itineraries involved. We note that, consistent with our statutory responsibilities, including those under 49 U.S.C. 41712, it is important in implementing section 145 to avoid uncertainty and unnecessary harm to the industry and the public. We therefore intend to continue to monitor this situation and work with all carriers informally to ensure that the Congressional intent of section 145 is effectuated in any given situation.
