

interpretation of the State of Louisiana's narrative water quality criterion for toxic substances using EPA's Draft Criteria Document for atrazine (Ambient Aquatic Life Water Quality Criteria for Atrazine—Draft, EPA 822-D-010002, August 2001) and used that interpretation as the basis for establishing the Big Creek TMDL for atrazine.

During the comment period for this TMDL, commenters submitted information stating that under Louisiana water quality standard provisions (LAC 33:IX,1113.C.6) it was not appropriate to use a draft criterion document value and that the Louisiana procedures should be used. EPA has evaluated these comments and has concluded that using the calculation procedure found in the Louisiana water quality standards provisions is more appropriate for establishing a screening value for atrazine in this particular case. Based on its modification of the screening value used for interpretation of Louisiana's narrative water quality criterion of "no toxics in toxic amounts," EPA concluded that the applicable water quality standard for the Big Creek is not, and was not at the time EPA established this TMDL, exceeded for atrazine in the water column.

Therefore, in the exercise of its discretion, EPA is withdrawing the Big Creek TMDL established in February 2001 for atrazine. Because Big Creek is not listed for atrazine on the Louisiana 303(d) list, LDEQ has no present obligation under the CWA to submit to EPA a TMDL for atrazine for Big Creek, nor does the CWA require EPA to maintain this TMDL. Three other TMDLs for Big Creek, DDT, carbofuran, and methyl parathion are not affected by this determination.
