

SUPPLEMENTARY INFORMATION: Millerton Lake is located in the southern portion of California's Central Valley in Fresno and Madera counties. The lake lies in the upper San Joaquin River Watershed. The San Joaquin River has an average annual inflow of 1,860,000 acre-feet upstream of Friant Dam. Millerton Lake was created in 1942 by the construction of Friant Dam, approximately 25 miles northeast of Fresno. The dam is a concrete gravity structure, 319 feet high and 3,488 feet wide at its crest.

Millerton Lake has a total storage capacity of 520,500 acre-feet and supplies water to the Central Valley Project water users. The lake and the majority of adjacent lands are owned by Reclamation. Land within the project area is managed by Reclamation and the California Department of Parks and Recreation.

Millerton Lake is a multi-purpose facility, supplying agricultural irrigation water, flood control, and recreational functions such as boating, fishing, camping, and swimming. The lake receives approximately 600,000 visitor days per year. Operation of the reservoir requires evacuation of a large portion of the storage space prior to the rainy season. Due to its small capacity compared to the potential runoff from the watershed, it is necessary to draw down water levels annually to its minimum pool in order to make effective use of available storage space. Thus, there is little opportunity to carry over water from one season to another.

Reclamation is preparing an RMP and General Plan for the Millerton Lake area. The RMP will specifically address the Millerton Lake State Recreation Area, including the entire lake and all Reclamation land surrounding the lake. The objectives of the joint plan are to establish management objectives, guidelines, and actions to be implemented by Reclamation directly, or through its recreation contract with the California Department of Parks and Recreation, that will protect the water supply and water quality functions of Millerton Lake; protect and enhance natural and cultural resources in the Recreation Area, consistent with Federal law and Reclamation policies; and provide recreational opportunities and facilities consistent with the Central Valley Project purposes, and Reclamation policies. In addition, the General Plan is the primary management guideline for defining a framework for resource stewardship, interpretation, facilities, visitor use, and services. General plans define an ultimate purpose, vision, and intent for management through goal statements, guidelines, and broad objectives, but

stop short of defining specific objectives, methodologies, and designs on how to accomplish these goals.

The development of the RMP and General Plan will be performed within the authorities provided by the Congress through the Reclamation Act, Federal Water Project Recreation Act, Reclamation Recreation Management Act, and applicable agency and Department of the Interior policies and the California Public Resources Code Division 5.

The RMP and General Plan shall be a long-term plan (with an approximate 20-year planning horizon) that will guide specific actions in the Millerton Lake State Recreation Area and on Reclamation lands surrounding the lake. The RMP and General Plan will be developed based on a comprehensive inventory of environmental resources and Project facilities. It will include an analysis of resources in the area, identification of land use suitability and capability, and development of management policies, objectives, responsibilities, guidelines, and plans. Resource areas to be addressed in the RMP and General Plan include: Soils and geology, biology, cultural resources, water resources, hydrology, groundwater and water quality, land use, transportation/traffic, rangeland, fire/fuels management, hazardous materials, recreation, and park administration. Data from these resource areas will be included in a GIS database, as available.

The RMP and General Plan will enable managers to make land use and resource decisions that are consistent with the overall management objectives of Reclamation land and water areas, while meeting the needs of the public. The RMP and General Plan will assist Reclamation in its efforts to minimize conflicts among the competing interests and types of use at Millerton Lake.

The RMP and General Plan will be developed through a cooperative effort between the Federal and State agencies and the public in an effort to manage the similar resources in the area as one. The plan will be developed with input from other Federal agencies such as U.S. Fish and Wildlife Service, the U.S. Forest Service, and the Bureau of Land Management; involved state agencies such as the California Department of Fish and Game and the California Department of Forestry and Fire Protection; and local involved agencies such as Friant Water Users Authority and the Chowchilla Madera Water and Power Authority; and the general public.

The environmental impacts of the RMP and General Plan and associated

alternatives will be assessed in a PEIS/EIR that will be prepared concurrent with the RMP and General Plan. The environmental review will focus on the potential for management actions to cause adverse environmental impacts to natural and cultural resources such as water quality, endangered species, public safety, and historic resources. It will include an analysis of alternative land, recreation, and natural resource management approaches. The joint document will be programmatic in nature in that it will be used as a planning tool to guide future resource management. Specific projects will tier off this programmatic document and will have their own environmental process and report.

It is Reclamation's practice to make comments, including names and home addresses of respondents, available for public review. Individual respondents may request that we withhold their home address from public disclosure, which we will honor to the extent allowable by law. There may also be circumstances in which we would withhold a respondent's identity from public disclosure, as allowable by law. If you wish us to withhold your name and/or address, you must state this prominently at the beginning of your comment. We will make all submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, available for public disclosure in their entirety.

Dated: December 4, 2002.

Frank Michny,

Regional Environmental Officer, Mid-Pacific Region.

DEPARTMENT OF LABOR

Mine Safety and Health Administration

Proposed Information Collection Request Submitted for Public Comment and Recommendations; Qualification and Certification Program

ACTION: Notice.

SUMMARY: The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden conducts a pre-clearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the Paperwork Reduction Act of 1995 (PRA95) [44 U.S.C. 3506 (c)(2)(A)]. This

program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed.

Currently, the Mine Safety and Health Administration (MSHA) is soliciting comments concerning the extension of the information collection related to the 30 CFR Sections 75.100—Certified Person; 75.155—Qualified hoisting engineer; qualifications; 77.100—Certified Person; and 77.105—Qualified hoist-man; slope or shaft sinking operation; qualifications.

DATES: Submit comments on or before April 4, 2003.

ADDRESSES: Send comments to Jane Tarr, Management Analyst, Administration and Management 1100 Wilson Boulevard, Room 2171, Arlington, VA 22209–3939. Commenters are encouraged to send their comments on computer disk, or via Internet E-mail to *Tarr-Jane@Msha.Gov*. Ms. Tarr can be reached at (202) 693–9824 (voice), or (202) 693–9801 (facsimile).

FOR FURTHER INFORMATION CONTACT: Jane Tarr, Management Analyst, Records Management Group, U.S. Department of Labor, Mine Safety and Health Administration, Room 2171, 1100 Wilson Boulevard, Arlington, VA 22209–3939. Ms. Tarr can be reached at *Tarr-Jane@Msha.Gov* (Internet E-mail), (202) 693–9824 (voice), or (202) 693–9801 (facsimile).

SUPPLEMENTARY INFORMATION:

I. Background

Persons performing tasks and certain required examinations at coal mines which are related to miner safety and health, and which required specialized experience, are required to be either “certified” or “qualified”. The regulations recognize State certification and qualification programs. However, where state programs are not available, under the Mine Act and MSHA standards, the Secretary may certify and qualify persons for as long as they continue to satisfy the requirements needed to obtain the certification or qualification, fulfill any applicable retraining requirements, and remain employed at the same mine or by the same independent contractor.

Applications for Secretarial certification must be submitted to the MSHA Qualification and Certification Unit in Denver, Colorado. MSHA Forms 5000–4 and 5000–7 provide the coal mining industry with a standardized reporting format that expedites the certification

process while ensuring compliance with the regulations. The information provided on the forms enables the Secretary of Labor’s delegate—MSHA, Qualification and Certification Unit—to determine if the applicants satisfy the requirements to obtain the certification or qualification. Persons must meet certain minimum experience requirements depending on the type of certification or qualification applied for.

MSHA is presently in the process of streamlining its Forms. Forms 5000–4 and 5000–7 will be combined into one form 5000–41 for future use by coal mine operators. MSHA is requesting approval of this form.

II. Desired Focus of Comments

MSHA is particularly interested in comments which:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency’s estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

A copy of the proposed information collection request can be obtained by contacting the employee listed in the **FOR FURTHER INFORMATION CONTACT** section of this notice, or viewed on the Internet by accessing the MSHA home page (<http://www.msha.gov>) and then choosing “Statutory and Regulatory Information” and “Federal Register Documents.”

III. Current Actions

This request for collection of information contains provisions whereby persons may be temporarily qualified or certified to perform tests and examinations; requiring specialized expertise; related to miner safety and health at coal mines.

Type of Review: Extension.

Agency: Mine Safety and Health Administration.

Title: Qualification and Certification Program.

OMB Number: 1219–0069.

Recordkeeping: The information collection requires respondents to submit only the original MSHA form to the Agency. The information collection does not require the maintenance of records. However, 30 CFR 75.159 and 77.106 require mine operators to maintain lists of all certified and qualified persons. This recordkeeping requirement has been approved by OMB under control number 1219–0127.

Frequency: On Occasion.

Affected Public: Business or other for-profit.

Respondents: 684.

Estimated Time Per Respondent: .28 hours.

Total Burden Hours: 192 hours.

Total Burden Cost (capital/startup): \$0.

Total Burden Cost (operating/maintaining): \$0.

Comments submitted in response to this notice will be summarized and/or included in the request for Office of Management and Budget approval of the information collection request; they will also become a matter of public record.

Dated at Arlington, Virginia, this 28th day of January, 2003.

David L. Meyer,

Director, Office of Administration and Management.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice (03–007)]

NASA Advisory Council, Aerospace Technology Advisory Committee, Revolutionize Aviation Subcommittee; Meeting

AGENCY: National Aeronautics and Space Administration (NASA).

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Public Law 92–463, as amended, the National Aeronautics and Space Administration announces a forthcoming meeting of the NASA Advisory Council, Aerospace Technology Advisory Committee (ATAC), Revolutionize Aviation Subcommittee (RAS).

DATES: Tuesday, February 25, 2003, 8 a.m. to 4:30 p.m.

ADDRESSES: National Aeronautics and Space Administration, Room 7H46, 300 E Street, SW., Washington, DC 20546.
