*Description:* The collection of information in the standard is necessary for implementation of the requirements of the standards. The information is used by employers to assure that processes using highly hazardous chemical with the potential of a catastrophic release are operated as safely as possible. The employer must thoroughly consider all facets of a process, as well as the involvement of employees in that process. Processes are analyzed by employers so that they identify and control problems that could lead to a major release, fire or explosion. The failure of employers to collect the information will significantly impact OSHA's effort to control and reduce injuries and fatalities in workplaces,

which have the potential for highly hazardous chemical catastrophes.
