

pertinent literature, and information available in Service files. After our review, we find the petition does not present substantial information to indicate that the petitioned action may be warranted. We base this finding on a lack of evidence to support a separation of the greater sage grouse into eastern and western subspecies, and also on our determination that the western population of sage grouse does not constitute a DPS on the basis of the following: (a) insufficient information to determine whether the western population of sage grouse is geographically separated from other sage grouse throughout the range of the taxon; and (b) insufficient information to demonstrate that genetic, morphological, and behavioral aspects of the western population of sage grouse are unique.
