SUPPLEMENTARY INFORMATION:**I. Abstract**

The American Fisheries Act (AFA) established an allocation program for the pollock fishery of the Bering Sea and Aleutian Islands Management Area (BSAI) which imposed major structural changes on the BSAI pollock fishery. The AFA provides the BSAI pollock fleet the opportunity to conduct their fishery in a more rational manner, while protecting non-AFA participants in the other fisheries. The AFA also affected the management of other groundfish, crab, and scallop fisheries off Alaska.

Much of the monitoring and enforcement burden is placed on participating AFA cooperatives and their members, which allows NOAA to manage the pollock fishery more precisely. Monitoring their own catch, vessels are able to individually (and in aggregate) come very close to harvesting exactly the amount of pollock they were allocated. NOAA requires certain reports and information to allow it to manage the fishery and monitor the program.
