[Docket No. CP03-42-000]

Gulf South Pipeline Company, LP; Notice of Application

February 4, 2003.

Take notice that on January 24, 2003, Gulf South Pipeline Company, LP (Gulf South), 20 East Greenway Plaza, Houston, Texas 77046, filed in Docket No. CP03-42-000, an application pursuant to Sections 7(c) of the Natural Gas Act (NGA), as amended, and part 157 of the regulations of the Federal Energy Regulatory Commission (Commission), to increase the maximum allowable operating pressure (MAOP) of its Index 135 transmission facility in Calcasieu Parish, Louisiana. Gulf South states that the increase will provide sufficient pressure to ensure service to existing markets, all as more fully set forth in the application which is on file with the Commission and open to public inspection. This filing is available for review at the Commission or may be viewed on the Commission's Web site at <http://www.ferc.gov> using the "FERRIS" link. Enter the docket number excluding the last three digits in the docket number field to access the document. For assistance, please contact FERC Online Support at FERCOnlineSupport@ferc.gov or toll-free at (866) 208-3676, or for TTY, contact (202) 502-8659.

Specifically, Gulf South states that the increase in MAOP will result in an increase in Index 135's daily design capacity flowing north to south, 148 mmcf/d and on the south to north flow, 69 mmcf/d. Accordingly, the uprate allows Gulf South to continue to serve its traditional markets while augmenting deliverability and delivery by utilizing gas flowing from Index 201-9 for north to south flows.

Any questions concerning this application may be directed to J. Kyle Stephens, Director of Certificates, Gulf
