

the Medford District Office. Single copies will also be available for inspection during normal working hours at the Oregon State Office, Public Room, 333 SW., 1st Avenue, Portland, Oregon, 97204. The document may also be reviewed on the Medford District planning Web site at <http://www.or.blm.gov/Medford/planning/Medplanningdocs.html>. The public has the opportunity to protest the proposed RMP amendment components, as described in the Final EIS. The BLM planning regulations, 43 CFR 1610.5–2, state that any person who participated in the planning process and has an interest which may be adversely affected, may protest. A protest may only raise those issues that were submitted for the record during the planning process. The BLM will make its decisions after review of protests (if any).

To be considered complete, your protest must contain, at a minimum, the following information:

- Name, mailing address, telephone number and the affected interest of the person filing the protest(s).
- A statement of the issue (or issues) being protested.
- A statement of the part (or parts) of the proposed plan amendment being protested. To the extent possible, reference specific pages, paragraphs and sections of the document.
- A copy of all your documents addressing the issue (or issues) which were discussed with BLM for the record.
- A concise statement explaining why the proposed decision is believed to be incorrect. This is the critical part of your protest. Document all relevant facts, as much as possible, referencing or citing the planning and environmental analysis documents. A protest that merely expresses disagreement with State Director's proposed decisions without any data will not provide us with the benefit of your information and insight. In this case, the Director's review will be based on the existing analysis and supporting data.

Since this plan is a combination of RMP amendments and subordinate implementation or activity plans, the planning protest provision only applies to the proposed amendments and related findings. The subordinate actions, such as forest health treatments and individual timber sales will be subject to applicable administrative review and appeal provisions at later dates. The planning protest process does not provide for consideration of objections to those actions at this time.

The FEIS analyzes three action alternatives and a no-action alternative, each developed with differing emphasis.

The alternatives were designed to address, in different ways, the land and resource management issues identified in the early stages of the planning process. The range of management actions includes timber harvest of anywhere from 3.1 to 11.9 million board feet (MMBF), 5,000–6,000 acres of fuel hazard reduction treatments, restoration activities, road decommissioning, water source enhancement projects, and other land management direction. Public participation has occurred throughout the planning process. Public comments were solicited during scoping and through a 90 day comment period for the draft EIS. The comments were analyzed and utilized where applicable to clarify and strengthen the FEIS.
