

wetland and grassland habitats; Alternative 2—historical management of refuge habitats and wildlife to replicate pre-settlement conditions; Alternative 3—the intensive management of refuge habitats and refuge program to increase outputs in certain areas; and the preferred Alternative 4—modified historical management of habitats for native birds and wild animals and to pursue a more natural historic management regime. The alternatives were assessed in the Draft CCP management plan and Environmental Assessment. Based on this assessment and comments received, the preferred Alternative 4 was selected for implementation.

The preferred alternative was selected because it best meets the purposes of the Refuge to reserve and set apart as a refuge and breeding ground for birds and wild animals. The preferred alternative will also provide for public access for wildlife-dependent recreation, and provides environmental education opportunities related to fish and wildlife resources.
