

Elmore, Director of Development of the Piedmont Triad Airport Authority at the following address: Post Office Box 35445, Greensboro, NC 27425.

FOR FURTHER INFORMATION CONTACT:

Tracie D. Kleine, Program Manager, Atlanta Airports District Office, 1701 Columbia Ave., Suite 2-260, Atlanta, GA 30337-2747, (404) 305-7148. The application may be reviewed in person at this same location.

SUPPLEMENTARY INFORMATION: The FAA is reviewing a request by the Piedmont Triad Airport Authority to release 169.20 acres of surplus property at the Piedmont Triad International Airport. This fee simple title transfer of land to the North Carolina Department of Transportation (NCDOT) is for the purpose of providing Right-of-Way (ROW) for the relocation of a portion of Bryan Boulevard. Bryan Boulevard will be a multi-lane, limited access highway that will provide improved access to and from the airport and is required as part of the overall GSO master plan development. The proposed use of this property is compatible with airport operations.

Any person may inspect the request in person at the FAA office listed above under **FOR FURTHER INFORMATION CONTACT**. In addition, any person may, upon request, inspect the request, notice and other documents germane to the request in person at the Piedmont Triad Airport Authority.

Issued in Atlanta, Georgia, on December 26, 2002.

Scott L. Seritt,

Manager, Atlanta Airports District Office, Southern Region.

High Density Traffic Airports; Notice of Slot Usage Waiver

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of temporary slot usage waiver at high density traffic airports.

SUMMARY: This notice announces a five-day waiver of the minimum slot usage requirement at New York's John F. Kennedy and LaGuardia Airports and Washington's Reagan National Airport for the period February 15, 2003 through February 19, 2003, due to extended airport closures and the operational recovery from a major snow storm impacting much of the northeastern United States.

DATE: February 27, 2003.

FOR FURTHER INFORMATION CONTACT:

Lorelei Peter, Operations and Air Traffic Law Branch, Regulations Division, Office of the Chief Counsel, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone number 202-267-3073.

SUPPLEMENTARY INFORMATION:

Background

On February 15, 2003, a major winter storm including snow and freezing rain began to impact operations at many airports in the eastern part of the United States, including the three high density traffic airports. This storm moved up the East Coast bringing significant snowfalls and resulted in airport closures or reduced airport capacity through Monday, February 17, 2003. On Tuesday, February 18, 2003, the airport authorities reopened all three high density airports and regular operations were resumed and on Wednesday, February 19, 2003, air traffic activity approached normal levels. However, on these two days, some airlines were unable to operate scheduled flights since aircraft or crews were not in position to operate the flights as scheduled.

Statement of Policy

The regulations governing slots and slot allocation provide that any slot not utilized at least 80 percent of the time over a 2-month period shall be recalled by the Federal Aviation Administration (FAA) (14 CFR 93.277(a)). Additionally, paragraph (j) of that section provides that the Chief Counsel may waive the slot usage requirement in the event of a highly unusual and unpredictable conditions that is beyond the control of the slot holder and exists for nine days or more (14 CFR 93.227(j)). These two provisions are also applicable to slot exemptions.

The FAA has determined the conditions described above warrant a temporary waiver of the minimum slot usage requirement for the period of February 15, 2003, through February 19, 2003, even though the conditions did not exceed eight days. Therefore, the FAA will treat as used any slot that was scheduled to operate during the period of the waiver regardless of whether the flight actually was operated. In the bi-monthly slot usage reports required by 14 CFR 93.227(i), slot holders/operators should indicate whether a flight was scheduled to operate in an allocated slot and whether the flight actually operated. Canceled flights should not be listed as operated unless they did in fact

operate. Carrier may indicate that a flight was scheduled to operate in a particular slot, but was subsequently canceled during this period, by using the "Z" code that is normally applied to flights canceled due to airport deicing programs.

Alternatively, carriers may list impacted slots/flights in a separate report. The FAA will then apply the usage waiver as appropriate to slots meeting the conditions.

Issued on February 20, 2003, in Washington, DC.

James W. Whitlow,

Deputy Chief Counsel.

We will consider all communications received on or before the closing date for comments. We may change the proposed policy because of the comments received.

Background

The proposed policy will further simplify the certification process pertaining to installation of the required 2-inch colored band outlining the exits on transport category airplanes. These bands are necessary so that rescue personnel can readily recognize exits in the side of the fuselage.

Issued in Renton, Washington, on February 13, 2003.

Ali Bahrami,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[Docket No. NHTSA 2003-14467; Notice 1]

Michelin North America, Inc., Receipt of Application for Decision of Inconsequential Noncompliance

Michelin North America, Inc., (MNA) has determined that approximately 504 size P225/55R17 BFGoodrich Comp T/A VR4 tires do not meet the labeling requirements mandated by Federal Motor Vehicle Safety Standard (FMVSS) No. 109, "New Pneumatic Tires."

Pursuant to 49 U.S.C. 30118(d) and 30120(h), MNA has petitioned for a determination that this noncompliance is inconsequential to motor vehicle safety and has filed an appropriate report pursuant to 49 CFR part 573, "Defect and Noncompliance Reports."

This notice of receipt of an application is published under 49 U.S.C. 30118 and 30120 and does not represent any agency decision or other exercise of judgment concerning the merits of the application.

FMVSS No. 109 (S4.3(e)) requires that each tire shall have permanently molded into or onto both sidewalls the actual number of plies in the sidewall, and the actual number of plies in the tread area if different.
