II. Background

In this issue of the **Federal Register** BLM is also publishing a Notice of Intent (NOI) to prepare an Environmental Impact Statement (EIS)

under the National Environmental Policy Act (NEPA) on the changes we are considering making to the regulations governing BLM's Grazing Administration Program. BLM is committed to making the changes to reflect the Secretary's "4C's" philosophy of "consultation, cooperation, and communication all in the service of conservation." BLM is issuing this Advance Notice of Proposed Rulemaking and the NOI to give the public and interested parties early information about the proposed action, the potential range of alternatives, and the nature of impact analysis being considered in the EIS. We will hold meetings during which the public will be able to comment on the scope, proposed action, and possible alternatives BLM should consider when drafting the proposed rule. BLM seeks comments on this Advance Notice of Proposed Rulemaking.

Since the first set of grazing regulations was issued after passage of the Taylor Grazing Act of 1934, as amended (43 U.S.C. 315, 315a–315r), the regulations have been periodically modified, revised, and updated. The last major revision effort culminated when BLM published and implemented comprehensive changes to the grazing regulations in 1995.

The changes BLM is considering would encourage partnerships in public land stewardship and establish new options for BLM and rangeland users in the administration and management of public lands. Our goals are to:

- (1) Enhance community-based conservation and citizen-centered stewardship;
- (2) improve BLM business practices; and
- (3) provide greater flexibility for the manager and the permittee.

III. Description of Information Requested

BLM is committed to carrying out the Secretary's objectives and the Rangeland Management Program established by the Federal Land Policy Management Act of 1976 (43 CFR 1740), the Public Rangelands Improvement Act of 1978 (43 U.S.C. 1901–1908), and the Taylor Grazing Act of 1934, as amended (43 U.S.C. 315, 315a–315r). We encourage the public to participate in planned public meetings and to provide comments and suggestions to help us clearly define needed changes in the Grazing Administration Program. We specifically are requesting comments on the topics we are considering for the proposed rule. These include, but are not limited to, the following:

- A. Definitions; We are considering revising or creating definitions of the following terms:
- Active use
 - Authorized use
 - Base property
 - Grazing lease
 - Grazing permit
 - Grazing Preference or Preference
 - Livestock kind or kind of livestock
 - Monitoring
 - Reserve common allotment

B. We are considering changing regulations to clarify current requirements and to allow better rangeland management and permit administration. Changes we are considering include:

- Clarifying the permit renewal performance review requirements when grazing permits are pledged as security for loans.
- Clarifying who is qualified for public lands grazing use and who will receive preference for a grazing permit or lease.
- Clarifying the provisions addressing grazing preference transfers.
- Reinstating an earlier provision that BLM and the permit holder may share title to certain range improvements if the improvement was constructed under a Cooperative Range Improvement Agreement.
- Clarifying that BLM will follow state law with respect to the acquisition of water rights.
- Examining whether BLM should authorize temporarily locked gates on public lands in order to protect private land and improve livestock operations.
- Clarifying which non-permit related violations BLM may take into account in penalizing a permittee.
- Considering ways to streamline the grazing decision appeal process.
- Extending the time period that BLM may approve nonuse of forage from 3 to 5 years for resource improvement, business, or personal needs.

C. We are also considering amendments related to changes in permitted use. Amendments we are considering include:

- Creating provisions re-emphasizing consideration of social, economic, and cultural impact, in addition to the ecological impacts, of Federal actions to ensure compliance with the National Environmental Policy Act.
- Requiring a permittee/lessee to apply to renew a permit or lease.
- What criteria BLM will consider before approving increases in permitted use.
- Considering whether to amend the provision stating when BLM will implement action that changes grazing management after determining that the allotments used by a permittee or lessee are not meeting or significantly progressing toward meeting land health standards.

D. We are considering adding the following new provisions to the regulations.

- Establishing and administering a new concept called "Reserve Common Allotments" (RCA). RCAs would be managed as reserve forage areas for use by permittees whose allotments are

undergoing restoration treatments and require rest from grazing. RCA forage would be allocated on a temporary non-renewable basis to permittees participating in restoration on their allotments.

- Adding a fee schedule for preference transfers, crossing permits, applications for nonuse, and replacement/supplemental billing under existing service charge authority. We do not intend to address grazing fees in this rulemaking.

E. We also plan to make minor revisions to correct typographical errors and to make technical changes to improve the clarity of the rule. One change we will make is to remove references to "conservation use" permits to reflect the decision in *Public Lands Council v. Babbitt*, 929 F.Supp. 1436 (D. Wyo. 1996), *rev'd in part and aff'd in part*, 167 F.3d 1287 (10th Cir. 1999), *aff'd*, 529 U.S. 728 (2000).

Additional information about BLM's Rangeland, Soils, Water, and Air Program is available at <http://web.blm.gov/internal/wo-200/wo-220/index.html>.

Dated: January 17, 2003.

Assistant Secretary of the Interior.
