To minimize any adverse impacts associated with a drought, the Commission required the licensee to file a drought contingency plan for the summer of 2003.

The licensee’s Drought Contingency Plan discusses competing demands for water in the Yadkin-Pee Dee River Basin and describes a process for monitoring and responding to drought conditions. The licensee’s plan includes: (1) declaring the existence of a drought when the U.S. Drought Monitor elevates 10% or more of the Yadkin—Pee Dee River basin to a drought severity classification of D1 or higher; (2) developing action and communication plans should drought conditions emerge; (3) holding meetings with officials from North and South Carolina, Progress Energy and the U.S. Fish & Wildlife Service to monitor conditions; (4) implementing operational changes to balance competing interests; and (5) continuing to study salt-water intrusion at fresh water intakes on the coast of South Carolina.
