Owners and operators of helium-bearing natural gas wells and transmission lines must submit Form 3100-12, Gas Well Data Survey of Helium-Bearing Natural Gas, to provide for gas sampling and analysis we use to locate helium occurrences in natural gases. BLM carries out this program under 74 Stat. 920, Public Law 104-273, Helium Privatization Act of 1996. The knowledge of helium occurrences is part of the Government's conservation program.

We request the following information on Form 3100-12:

(A) BLM needs the survey information to locate natural gas wells and evaluate the helium resources of the United States. Results of released gas well analyses and related data are published annually for Government, industry, and public use.

(B) *Field Survey Number:* The BLM, Helium Operations Office, assigns this number to record and catalog the gas sample. The number is necessary for reference and future identification of the gas sample.

(C) *State and County:* The geographical location is necessary to identify the source of the gas sample. After the gas source is identified, BLM uses this information to evaluate the potential for supplying helium.

(D) *Field, Well Name, and API Number:* This information identifies the source of the gas sample. Each producing state assigns official field designations to producing areas. BLM uses this information to determine
